

Microsoft CEO: Women should not ask for a raise

Microsoft CEO Satya Nadella told many female audience in the technology industry that women should not ask for a raise.

Microsoft CEO Satya Nadella told many female audience in the technology industry that women should not ask for a raise.

His words made the female audience extremely stunned and angry. *' There is really no need to ask for a raise, just know and be faithful that the company will give you the right salary and salary increase ,'* he told *Maria Klawe* , a computer scientist and city. member of Microsoft board of directors. He also implied that wisdom, goodness, cannot count on a woman who never asks what she really wants.

The audience members in the conference were immediately stunned, shocked and rushed to Twitter to express their anger. *' Thank God for being there to give good advice on salary increases ,'* wrote an audience named *Andrea Barrica*. This Twitter post was then republished a lot.

In a 2013 study, the American College of Graduates announced that female employees received only 78% of what men received.

Just last week, Microsoft announced out of its total technology-related workforce, 17.1% were female.
