

# Microsoft died of Windows 10 Creators Update version

According to the update and death schedule of Windows updates, from October 9, 2018, Microsoft officially launched Windows 10 Creators Update (1703) after more than a year of release.

According to the update and death schedule of Windows updates, from October 9, 2018, Microsoft officially launched Windows 10 Creators Update (1703) after more than a year of release. Accordingly, Home, Pro, and Workstation versions will not receive support from Microsoft.

Meanwhile, versions of Windows 10 Creators Update Enterprise (enterprise) and Education (education) will continue to be supported for another year and will be officially declared dead on October 8, 2019.

Under this roadmap, Fall Creators Update, April 2018 Update and October 2018 Update versions will still receive support from Microsoft until at least 2020.

You can follow the update route and death of Windows 10 versions in the image below.

Windows 10 version history	Date of availability	End of service for Home, Pro, and Pro for Workstation editions	End of service for Enterprise and Education editions
Windows 10, version 1809	October 2, 2018	April 14, 2020	April 13, 2021
Windows 10, version 1803	April 30, 2018	November 12, 2019	November 10, 2020
Windows 10, version 1709	October 17, 2017	April 9, 2019	April 14, 2020
Windows 10, version 1703	April 5, 2017	October 9, 2018	October 8, 2019
Windows 10, version 1607	August 2, 2016	April 10, 2018	April 9, 2019
Windows 10, version 1511	November 10, 2015	October 10, 2017	October 10, 2017
Windows 10, released July 2015 (version 1507)	July 29, 2015	May 9, 2017	May 9, 2017

As expected, Fall Creators Update (1709) will be the next version to be killed and on April 9, 2019. At that time, perhaps the major update of the first half of 2019 (Redstone 6) is also being released by Microsoft.

Currently, users who sign up for Skip Ahead, Fast Ring or Windows Insider can already experience new features in Windows 10 Redstone 6.

Users who are using Windows 10 Creators Update and lower versions should soon upgrade to a higher version so that they can receive important security patches or new features on Windows 10.
