

Microsoft has just freed all features on OneNote

Most Vietnamese and especially office workers should be familiar with software from Microsoft such as Word, Excel, PowerPoint and Outlook when they provide full features to support the daily work. However, in the Office installation package, there is still one more software that many people have not noticed until now, that is OneNote.

Most Vietnamese and especially office workers should be familiar with software from Microsoft such as Word, Excel, PowerPoint and Outlook when they provide full features to support the daily work. However, in the Office installation package, there is still one more software that many people have not noticed until now, that is OneNote.

This is an application that Microsoft integrates into Office to support users in the process of organizing and organizing their work in a more scientific and effective way. Especially with OneNote integrated on Windows Phone, you can save new ideas at any time and link them together easily. This application also syncs instantly when there is internet and remember that we will be very flexible in memorizing information as well as saving time working in groups.

The useful features as mentioned above, if anyone who has never used **OneNote** should download immediately to his computer because recently, Microsoft has given the entire functionality of this application for free. Accordingly, new features are 'unlocked' including:

1. **Password** - User can add password for important content.
2. **Bookmark page history** - Easily view or return to previous content.
3. **Record and record video** - Take notes right while recording, easily switch to other notes.
4. **Search by sound - Find** keywords in a recording or video.
5. **Embedded** files - Insert Office documents or other file into notebook.

More specifically, after creating an account and logging in, OneDrive will automatically provide 15 GB of free storage to users and you will no longer have to worry about the monthly salary as on Evenote.

Currently, OneNote 2013 is compatible with **Windows 7** and **Windows 8**.
