

# Microsoft is about to have updates for Mail, Calendar and People on April 2

Just like the previous rumor about Microsoft will launch an update for core applications in Windows 8 / RT, today, the company announced it will confirm a new update for Mail applications. , Calendar and People on next Tuesday, April 2.

**Just like the previous rumor about Microsoft will launch an update for core applications in Windows 8 / RT, today, the company announced it will confirm a new update for Mail applications. , Calendar and People on next Tuesday, April 2.**

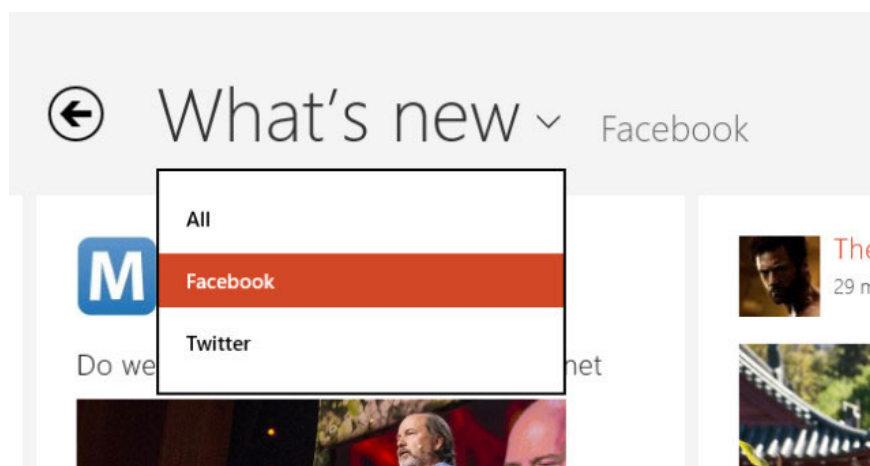

On **the official Windows blog** also confirms the above announcement and adds more details about the update. Accordingly, because the Mail application is pretty much used by users, in this new update, users will be able to manipulate more options such as marking important, editing mail, renaming or deleting folders. directly in the Mail application interface. In addition, this new update will allow users to search for any email on the server.

The update for the Calendar application will refresh this application interface with a more usable form. The application bar will have the option of " *Work week*" with schedule settings from Monday to Friday.
