

Microsoft launched the first ad clip of the Surface Pro 3

Invite you to enjoy the first promotional video for Surface Pro 3 with a lot of manipulation from the actors on the device to convey the purpose of Microsoft that is confirmed to users that Surface Pro 3 completely You can replace your PC (desktop).

Invite you to enjoy the first promotional video for Surface Pro 3 with a lot of manipulation from the actors on the device to convey the purpose of Microsoft that is confirmed to users that Surface Pro 3 completely You can replace your PC (*desktop*).

Need to repeat a bit for those who are not clear about the configuration of Surface Pro 3: This tablet is equipped with "standard" CPU Intel Core i7 laptop and so it is the thinnest device that uses this type of processor this. According to Microsoft, the Surface Pro 3 CPU is 10% more powerful than the previous generation and includes a cooling fan.

The battery of the device is also better than the previous generation, and although Microsoft does not mention the exact battery life for normal tasks, it is generally 15 to 20% higher than the battery in general. used in any other Surface before. To enhance connection speed, Microsoft also equips Surface Pro 3 with a USB 3.0 port.
