Microsoft has just launched the new Surface Pro X, which is rated as the most beautiful Surface it has ever created. Surface Pro X is improved on the screen, equipped with Qualcomm SQ1 chip.

Surface Pro X is designed a little differently than Surface Pro 7. According to Tom Warren of The Verge, the screen border of the Surface Pro X is made thinner.

The first special feature on the Surface Pro X is that the Mini DisplayPort has been replaced by two USB-C connectors. The 3.5mm headphone jack and the USB-A port have also been removed.

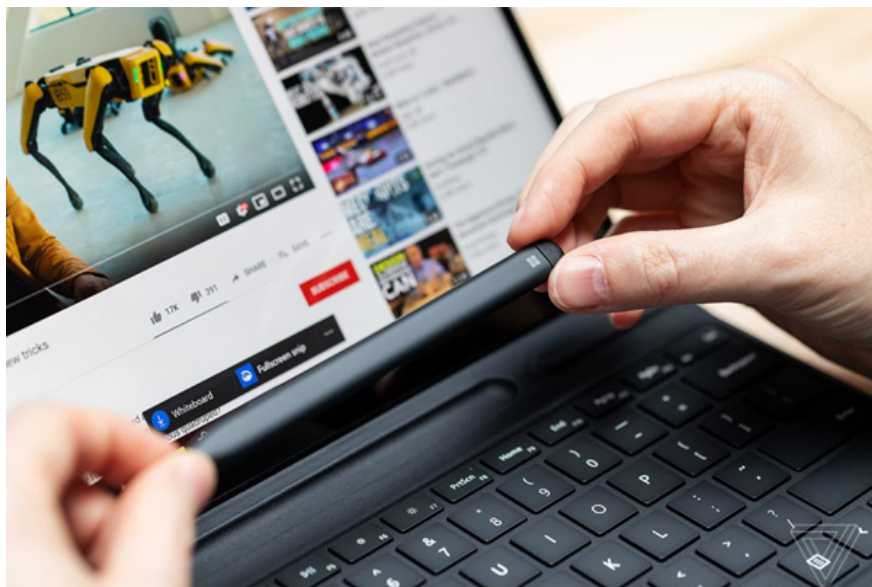

Surface Pro X is equipped with 13-inch screen, 2,880 x 1,920px resolution, 3: 2 aspect ratio, 267ppi pixel density, 1400: 1 contrast ratio. This model is only 5.3mm thin and weighs 774 grams.

The second special feature of this product is the SQ1 chip series created by Microsoft and Qualcomm. According to Microsoft, it has a built-in AI accelerator, 7W power consumption, performance ratio and 3 times more power consumption than Surface Pro 6. Surface Pro X has a longer battery life , up to 13 hours. It can achieve 80% battery after an hour of charging. Surface Pro X supports fast charging.

The Surface Pro X is equipped with a Type Cover keyboard that folds up to lift an angle that makes it easier to type, with more area for users to insert and charge the pen. When the pen is removed, a menu will automatically pop up to help you quickly perform drawing and writing operations.

In addition to Surface Pro X, Microsoft also introduced the Surface Pro 7 with a 12.3-inch screen, 10th-generation Intel Core i3, i5, i7 chips, USB-C connector, 4 GB RAM and 128 GB memory. .

The Surface Pro 7 costs \$ 750, and it will go on sale on October 22. The Surface Pro X costs \$ 1,000, and it hits shelves on November 5. Type Cover for Surface Pro X costs \$ 140, Slim Pen costs \$ 145, and Type Cover for Surface Pro 7 sells for \$ 130.
