

Microsoft Office 2019 executes OneNote, bundles all in Windows 10

Microsoft plans to launch Office 2019 later this year and will change the way of putting OneNote into its product suite.

Microsoft plans to launch Office 2019 later this year and will change the way of putting OneNote into its product suite. This note application is currently a removable desktop version included in Office 2016, and a Universal Windows App application on Windows 10.

Microsoft will replace the desktop version of OneNote with Windows 10 in Office 2019, and the Office 2019 suite will also run on Windows 10. There is also a Mac version for Office 2019 and an Office 365 subscription with features Latest.

The current desktop application OneNote 2016 will not receive new features but Microsoft will also update the security patch or fix the problem until it stops completely on 10/2020. Recently Microsoft has continually improved the OneNote Windows 10 application, intending to release a new feature.

Focusing on OneNote on Windows 10, Microsoft stopped OneNote desktop version

OneNote for Windows 10 will be updated with the ability to insert, search bookmarks, view Preview directly of Office files right in OneNote and Class Notebook.
