

Microsoft Office for iPad has additional printing features

Although the Office suite for iPad has brought resounding success to Microsoft as soon as it was launched, there are also many users complaining about the inconvenience when unable to perform the print function.

Although the Office suite for iPad has brought resounding success to Microsoft as soon as it was launched, there are also many users complaining about the inconvenience when unable to perform the print function.

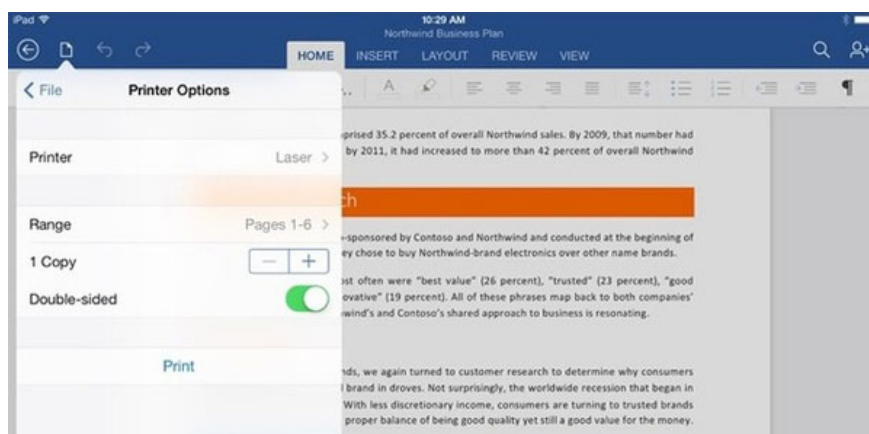

Microsoft quickly offset this flaw for its product with the latest update adding the AirPrint feature to both Word, Excel and PowerPoint.

Similar to the desktop version, users can choose to print by region, page or slide dynamically. In addition, Microsoft adds SmartGuides for PowerPoint to make it easier to align images or tables. Excel application also added AutoFit feature to customize the width of multiple rows or the height of multiple columns at the same time.
