

Microsoft Office for iPad has supported many people to fix files and drag and drop functions of iOS 11

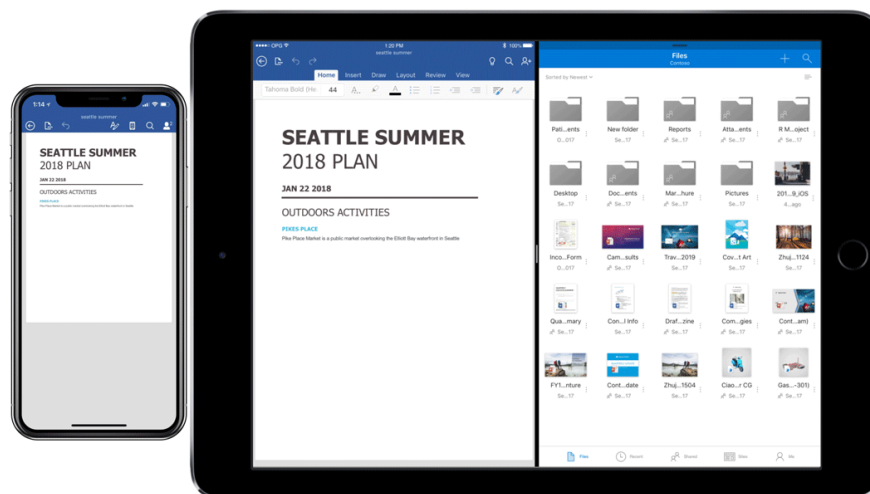

Microsoft Office for iPad has just been added a new feature that allows many people to edit in real time (similar to Google Docs), applicable to both Word, Excel and PowerPoint.

Microsoft Office for iPad has just been added a new feature that allows many people to edit in real time (similar to Google Docs), applicable to both Word, Excel and PowerPoint.

This feature has been integrated on Windows and macOS before. Thus, the entire Office ecosystem can work at the same time, very convenient. But to be able to use this feature, users need to save files on OneDrive or SharePoint.

This new update also supports dragging and dropping files from other apps into Office, can drag text and images to embed documents conveniently, or drag the chart between MS Office apps together. To do this, users only need to drag and drop operations on iOS 11.

In addition, with the new update, users can view Office files directly in email, web . using the Office app, without the need to do more steps to view intermediate files as before.

Drag and drop to insert images in Microsoft Office, the best office app for iPad.
