

Microsoft released a free Halloween theme for Windows 10

13 high quality wallpaper panels for Windows 10 PC.

Microsoft has just released new computer wallpaper for Windows 10 users on the occasion of Halloween.

Computer theme with Pumpkin Season theme for Windows 10 includes 13 wallpapers that users can download and install completely for free on the device.

One thing to note is that in order to use this theme, your computer must be from Windows 10 Fall Creators Update or more, so make sure you run the correct version of Windows 10 with support.

Microsoft stopped supporting Windows 10 Creators Update (version 1703) from the Patch Tuesday update this month, so users should upgrade their machines to ensure they receive updates and necessary security patches.

How to install theme on Windows 10

Downloading and installing themes is not difficult, Microsoft also posted on Microsoft Store to make it easier for users. You just need to click the **Install** button and wait. When the theme is ready, follow the link below to find and enable the new theme.

Settings> Personalization> Themes

Remember to save the theme before installing a new theme as this will be more convenient when you later want to go back to using the old theme. After turning on the new theme, you can 'walk' through the images in this theme by right-clicking on the desktop and selecting Next Desktop Background.

Before Windows 10, Microsoft still released a theme right on its website. But now there is a Microsoft Store, everything is up here. Near the holidays, you should also look forward to a related theme from Microsoft on this store.
