

Microsoft released a set of Nostalgic wallpaper images, reminiscent of iconic Windows images

On July 8, 2021, Microsoft released a set of wallpapers for the Teams application with the theme of Nostalgia. Microsoft's purpose is to recall to users what makes Microsoft iconic but in a more modern, fresh style.

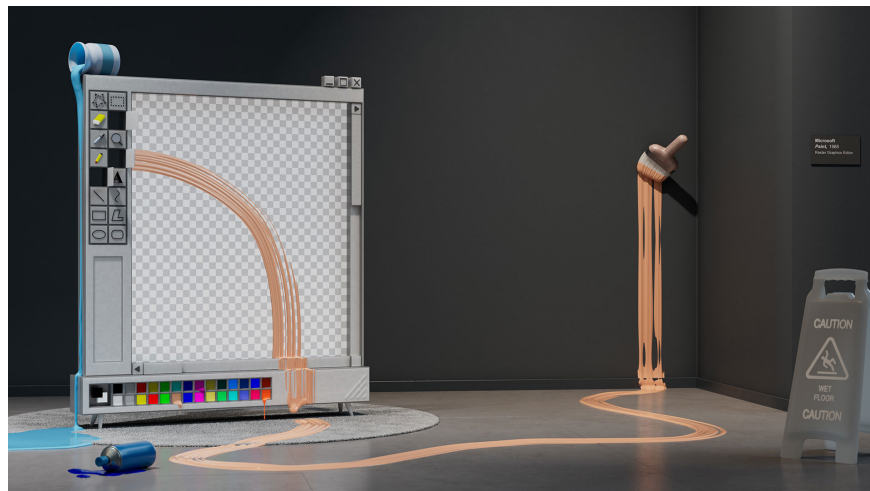

Clippy, the original virtual assistant character of Office applications appeared on Office 97 to 2003 and has been "dead" since the 2007 version of Office. Clippy impressing users is not a feature. useful but by the annoyance, more rigid. Microsoft reassures users that it is only "illustrative", and it will not be included in the Microsoft 365 suite.

Solitaire - a spider-based folk game that appeared on Windows 3.0 in 1990. Last May, this game just celebrated its 31st birthday. In 2019, it was included in the ranking of the most popular games of all time. Using this game itself to describe the legendary "super lag" image of Windows is probably not a bad idea at all.

Bliss-fully became the most popular photograph in the world. This is a picture taken by photographer Charles O'Rear in January 1996 and then Microsoft bought it and used it as the default wallpaper of Windows XP. Still Bliss-fully, but slightly edited in color and light, and with more flowers along the lawn.

The iconic Paint application has been 3D, but still has all the buttons and the classic gray area interface.
