

Microsoft released Font Maker, allowing users to freely create their own font on Windows 10

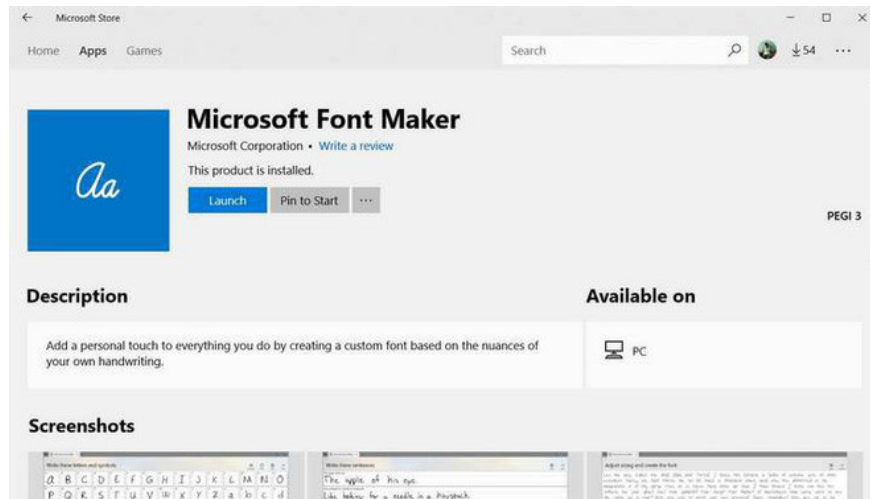

Font Maker is a font creation application that allows Windows 10 users to create their own personalized font by writing each letter and symbol.

Font Maker is a font creation application that allows Windows 10 users to create their own personalized font by writing each letter and symbol.

With Font Maker, users can create beautiful and more accurate font sketches with the help of a stylus or Surface Pen.

However, this new Microsoft self-created application only supports Windows 10 Fall Creators Update or Windows 10 April 2018 Update or more. Older versions cannot be installed.

The Font Make is now available on the Microsoft Store, Windows 10 users can download the installation and freely create their own unique fonts under the download link below.

1. Microsoft Font Maker
