

# Microsoft released Windows 10 Redstone update 5 build 17639, comprehensively improving Windows Sets

Recently Microsoft released an update of Windows 10 Redstone 5 build 17639 for Insider Fast with registration Skip Ahead.

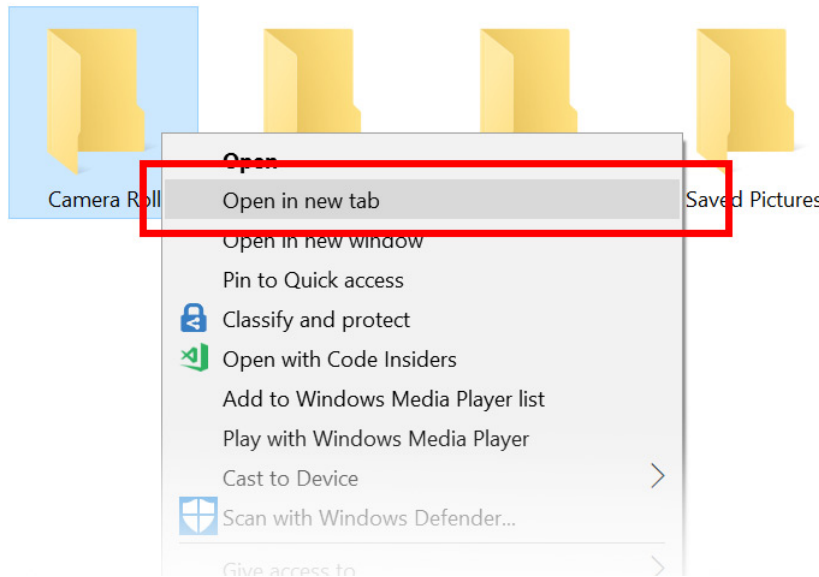

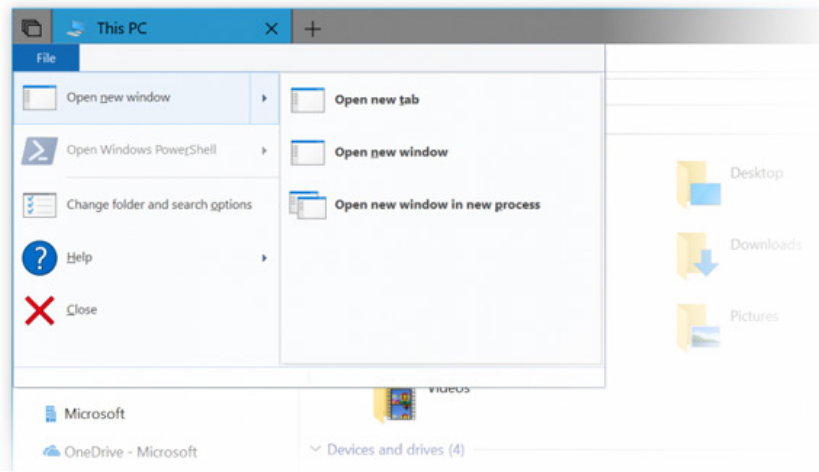

Recently Microsoft released an update of Windows 10 Redstone 5 build 17639 for Insider Fast with registration Skip Ahead. This update can fix many bugs in previous builds, and especially upgrade Windows Sets, a feature that helps you gather all tasks into one window.

Other features improved in Windows 10 Redstone 5 build 17639

1. Support drag / drop operation.
2. Support switching between tags with **Alt + Tab** key combination.
3. Improve Settings for Sets feature at Settings -> select System -> select Multitasking.

1. Open a new card in File Explorer by pressing Ctrl + T.
2. Improved interface makes users more interactive .

Besides, Windows 10 build 17639 still has some errors to overcome including:

1. Settings crash if you open Settings and click on a link to tips (tips) or Microsoft Store.
2. The Desktop may be displayed for a while before Lock Screen when it is out of sleep.
3. If the user denies access to the video library (Videos library), Movies & TV may crash when moved to the Personal tab.

To update Windows 10 build 17639 via OTA, go to **Settings** -> select **Update & security** -> select **Windows Update** . Or via ISO files with the download link below.

1. Windows 10 build 17639 x86
2. Windows 10 build 17639 x64
