

Microsoft revealed completely new interface of Windows 10

Microsoft will change the look of Windows 10, with new application icons and a new Start menu design.

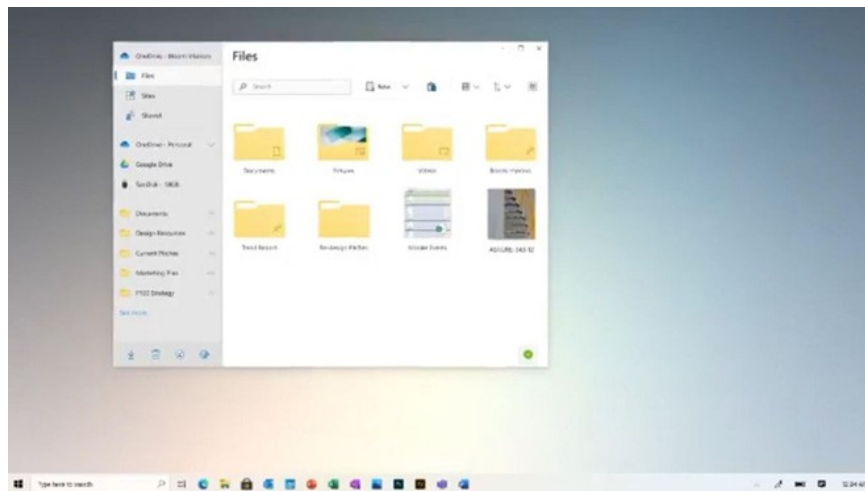

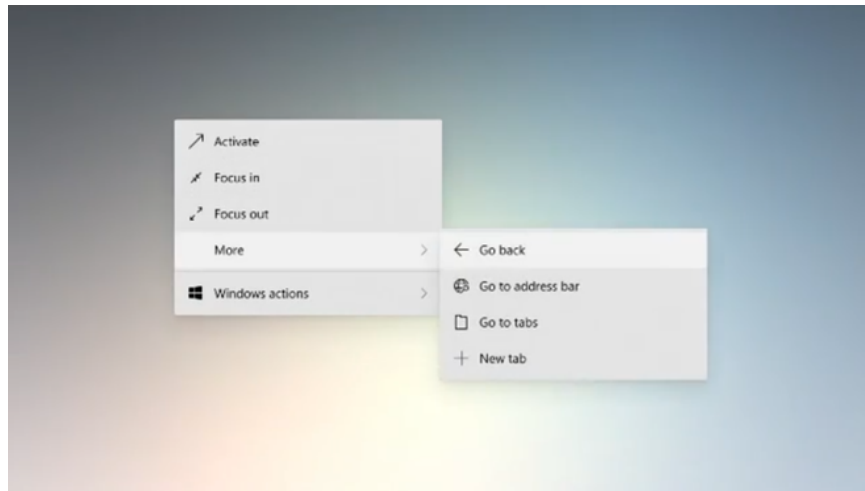

Earlier this week, Microsoft's Windows 10 operating system officially reached 1 billion users worldwide. Microsoft has also posted a video to commemorate this memorable milestone, which also reveals the upcoming Windows 10 completely new interface. The video was shared on Instagram by the director of Devices and Windows, Panos Panay.

Microsoft celebrated the milestone of 1 billion Windows 10 users.

Microsoft will change the look of Windows 10, with new application icons and a new Start menu design. The Live Tiles in the new Start menu will be less colorful, to create a sense of comfort. Overall, the new design will lead to minimalism.

Besides, Microsoft is also improving the design language Fluent Design of Windows 10, with more modern menus and even a completely new File Explorer interface. We have waited a long time for a new and more modern File Explorer interface.

Microsoft will also change many new application icons, more colorful and more modern. These updates are likely to be introduced by Microsoft during the Build developer event for developers.
