

Microsoft will enhance the encryption capabilities of the service

Microsoft said it would upgrade the encryption capabilities of its online services such as Outlook.com, Office 365, SkyDrive, Windows Azure to prevent intrusion from other organizations.

Microsoft said it would upgrade the encryption capabilities of its online services such as Outlook.com, Office 365, SkyDrive, Windows Azure to prevent intrusion from other organizations.

According to *Neowin* on December 5, this information is close to the source of *The Washington Post* published a few weeks ago.

The Washington Post source said that Microsoft will refine its services to **prevent the US National Security Agency (NSA) from** interfering with its databases.

Lawyer *Brad Smith* of Microsoft said they currently do not have any direct evidence that the NSA or other government organizations are intending to infiltrate Microsoft's database. However, to be safe, Microsoft will upgrade encryption capabilities to prevent any attack intent.

Brad Smith also said that enhancing encryption capabilities will be completed by the end of 2014.
