

# miHoYo reveals a lot of new information about Genshin Impact version 2.5

miHoYo promises to bring to the Genshin Impact gaming community a lot of exciting new content and characters in update 2.5.

Just over 1 week left until version 2.4 of Genshin Impact will officially end. And miHoYo's recent 2.5 update announcement livestream revealed a lot of important information about upcoming events and banners.

Specifically, the banner of Yae Miko will start first, followed by the parallel banner of Raiden Shogun and Kokomi. Yae Miko promises to be a character capable of exploding Genshin Impact's sales this February thanks to the high anticipation of fans. This girl will be a 5 star Lightning-type unit, using Magical Weapons with the swarming weapon of Kagura's Verity.

Besides the long-anticipated characters, miHoYo has suddenly announced a completely new face - Kamisato Ayato. This guy is Kamisato Ayaka's older brother and a Water-type character that wields a Single Sword.

One of the interesting features that will appear in update 2.5 is that the game will allow players to design their own Secret Landscape. These are challenging stages for gamers to earn materials and holy relics.

In addition, the story of the land of Inazuma will also continue and players are about to encounter Raiden Shogun - likely the 2nd weekly boss next to Signora.

"Deep Rock" is one of the new content that will appear in update 2.6 alongside Kamisato Ayato. This is a brand new area where players have to fight new enemies and bosses.

**Genshin Impact 2.5 is expected to be officially released on February 16, 2022.**
