

# MindManager 2012 - Powerful and professional collaboration 'on the cloud'

MindManager is one of the tools that occupies the number one position in the field of mind mapping, concept development and strategic planning. Recently, Mindjet launched an upgraded version of 2012 to give users a powerful and professional collaboration product with many useful features.

*TipsMake.com* - MindManager is one of the tools that occupy the number one position in the field of mind mapping, concept development and strategic planning. Recently, Mindjet launched an upgraded version of 2012 to give users a powerful and professional collaboration product with many useful features:

- **Guided Brainstorming** : Group discussion to create ideas or problem-solving is done in a simple and effective way based on MindManager's 3-step process. When clicking the **Brainstorm** icon on the tab **Home** , first, you use predefined questions, then use the visual flash cards to express the idea, and eventually develop your action plan with classification branches and do Smooth idea.

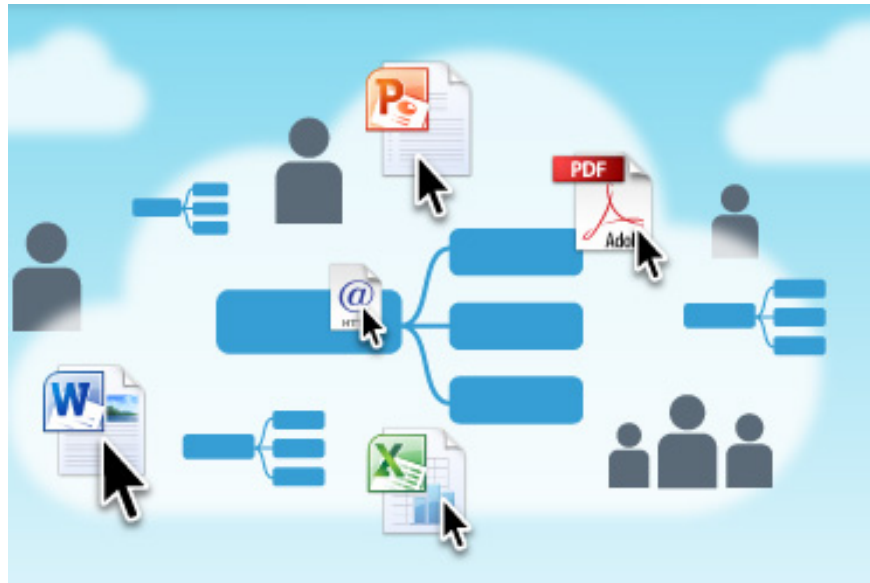

- **Analysis View** : The new feature is the SWOT analysis chart. Users can make the right strategic decisions by dragging and dropping topics into appropriate frames in the analysis chart.

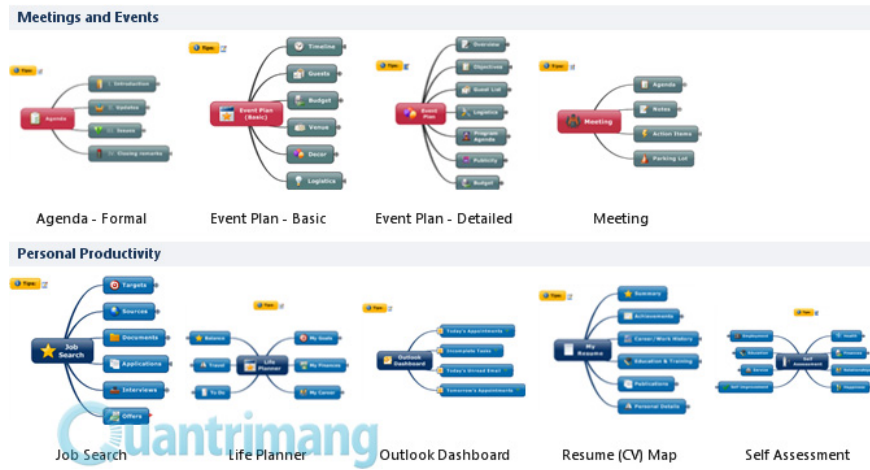

- **Mindjet Connect** is a preeminent feature that helps members of a group to collaborate on building a 'cloud based' strategic plan anywhere at any time. Mindjet Connect allows team members to access, share plans and other file types. Currently, users can subscribe to the free version at [www.mindjet.com/connect](http://www.mindjet.com/connect). If you want to collaborate fully, you should buy the Business version.

The feature of Mindjet Connect is real *-time collaboration* . You can invite any person to join and grant the appropriate rights to them. Any changes related to the participants are recorded. At the same time, in the process of collaboration, all team members clearly see the changes updated in real time. Colors and markup tools make it easy for people to track changes. The ability of many team members to add ideas to the plan is also supported by this version.

Besides, you can use many different types of devices such as iPhone, iPad . to access, edit plans offline and store on your desktop. MindManager 2012 has a mechanism to help you synchronize your changes with the team anytime, anywhere safely.

- **Dynamic SharePoint Integration** : **Integration** of Microsoft SharePoint and MindManager, allowing users to easily find, organize and manipulate tasks and resources right on Microsoft SharePoint
- **Index Index** creates a real-time list to help you quickly move through remarkable topics. This feature is particularly suitable when developing big thinking maps or plans. To use, click the **Index Marker** icon on the **Home** tab.
- **Built-in Templates** : to be simple and save time for users, MindManager 2012 offers more than 35 templates of categories such as: project planning, strategic planning, management and problem solving, succession personal planning, drafting events. Alternatively, you can access hundreds of templates at [www.mindjet.com/mindmanager-new-templates](http://www.mindjet.com/mindmanager-new-templates).

MindManager 2012 also offers improvements such as creating a Gantt chart to track progress by dragging and dropping topics in a visual way; easily arrange, filter and manage tasks; Multiple hyperlink function allows multiple links to be assigned at a specific topic. In addition, this new version adds a ' *How To task pane* ' featuring videos, images and tutorials to help new users quickly access and more experienced users. Download the trial version here.
