

# Minecraft 26.1 Snapshot 5: Golden Dandelion Appears and Baby Sea Monster Remodeled

Minecraft update 26.1 Snapshot 5 introduces the Golden Dandelion flower, which prevents baby animals from growing and changes the appearance of adorable baby sea mobs.

**Minecraft 26.1 Snapshots** always offer an early look at features that will appear in the upcoming official update. Even though this is just an experimental version, you can still download it to experience it right away. In this **Snapshot 5**, Mojang has shifted the focus from land animals to **aquatic** mobs, and completely revamped the appearance of their offspring.

Snapshot 5 focuses on making the ocean more "adorable" with revamped **baby sea mob** models. These tiny creatures now have more proportionate heads and bodies, no longer looking as bizarre as before.

**The redesigned (remodeled) child mobs include:**

1. Dolphins
2. Squids & Glow Squids
3. Sea turtles (Turtles)
4. Mexican salamander (Axolotls)

These creatures now look completely different from their adult versions: rounder and more "playful." Additionally, their **Bounding Box** has been redesigned to better suit real-world movement and collisions.

## How to craft and use Golden Dandelion

The most exciting feature is the magical flower called **the Golden Dandelion** . This is a rare, craftable flower that allows players to control whether mobs grow or remain forever in their "baby" form.

### The recipe for crafting Golden Dandelion:

To craft it, you need **1 common dandelion** and **8 gold nuggets** .

1. Open **the Crafting Table** .
2. Place the dandelion in the center slot.
3. Surrounded by 8 golden beads.

**Effect:** When you feed Golden Dandelion to baby mobs, their aging process will **stop completely** , and they will remain small forever.

**Note:** You cannot use Golden Dandelion on **hostile mobs** or **Villagers** .

## Other valuable improvements

In addition to the changes mentioned above, **Baby Chickens** now have their own distinct sound set instead of sharing the same sounds as adult chickens. Although it's a small change, it makes the Minecraft world much more realistic and vibrant.

Those are all the important changes in **Minecraft 26.1 Snapshot 5**. What do you think of these features? Have you tried downloading the latest Java Snapshot version yet? Leave your comments below!
