

Minecraft: How to Ride a Fun Ghast

The Happy Ghast can carry up to four players at a time. If you craft a lead and tie one end to the Happy Ghast and the other end to a boat, it can pull two other creatures onto the boat.

How can you ride the Happy Ghast in Minecraft ? The most important thing is that you need a bridle, and this bridle is not like any other bridle in the game. The detailed guide below will help you ride the Happy Ghast.

Items needed to craft a Happy Ghast riding harness in Minecraft

The recipe for crafting a harness in Minecraft requires very few items, and you can easily collect them early in the game. The required items include:

1. 3x Leather
2. 2x Glass
3. 1x Wool

Additionally, you will need a crafting table to create harnesses. Leather can be easily obtained by killing cows or sheep. Glass is created by burning sand in a furnace, and wool can be obtained by killing sheep or using shears to cut their wool.

How to Make a Reins in Minecraft

Once you have collected all of the above items, prepare your crafting table. Interact with the crafting table and follow these steps:

1. Place 3 pieces of leather in the boxes on the top row.
2. Place 1 piece of yarn (any color) in the center square of the middle row.
3. Place 2 glass blocks in the left and right cells of the wool piece.

The reins will appear in the right slot with a color corresponding to the color of the wool you used. You can drag and drop this reins into your inventory to get the reins.

Once you have crafted the bridle, you will need to find a Happy Ghast. This process involves taking a dried ghash block and growing it into a ghashling, which will then grow into a Happy Ghast.

Once you have this adorable flying creature, follow the steps below to ride the Happy Ghast in Minecraft:

1. **Step 1:** Equip the reins in your right hand and hold a snowball in your left hand to attract the Happy Ghast.

2. **Step 2:** When the Happy Ghast gets close, right-click and face it to put on the bridle.
3. **Step 3:** The Happy Ghast will be equipped with a harness with a pair of goggles on its head, like a pilot.
4. **Step 4:** Now, just stand near it and right click to ride.

The Happy Ghast can carry up to four players at a time. If you craft a lead and tie one end to the Happy Ghast and the other end to a boat, it can pull two other creatures on the boat. Similarly, you can replace the boat with heavy creatures like pandas or similar to transport them over great distances.
