

# MobiFone provides eSIM to customers in Vietnam

MobiFone is the first network operator in Vietnam to bring the eSIM to users.

MobiFone is the first network operator in Vietnam to bring the eSIM to users. According to the latest information, MobiFone has successfully tested and is starting to offer Esim to customers starting from May 29, 2019.

## 1. Learn about eSIM new SIM technology for the future

In order to create favorable conditions for customers to experience the new features of eSIM, MobiFone is implementing a free eSIM declaration program for customers from June 15 to August 15, 2019 at stores. MobiFone in major cities nationwide.

Smart phones provided by MobiFone eSIM in the current period include iPhone XS Max, XS, XR and Google Pixel 2.

MobiFone representative said that the company always strives and wants its customers to experience the latest technology applications, first appearing in the world.

Since the eSIM on the device can contain from 03-05 phone numbers, iPhone users can now use 02 or more SIM cards instead of using the current SIM card.

Experts recognize eSIM technology as "World change", will allow users to easily switch networks right on the phone and turn operators into a utility system for users.
