

# Modern Millionaires Course - A Scam or Valuable training for Entrepreneurs

The internet has made it easy for both legit businesses and scammers to try their luck. In the early days of the Internet, scammers were on a roll. You must have got one of those fake inheritance or lottery emails, telling you that you have won or inherited millions of dollars.

If only life was that easy!

If it sounds too good to be true, it probably is. You must have heard the advice a million times. The good thing is, people are becoming more and more vigilant. They are usually able to tell if something is a scam or not.

It gets a little tricky when it comes to those premium courses that teach how to make money online. Some of them are scams or a complete waste of time but there are many which are not.

## How to tell between a scam and a money-making opportunity?

Start by searching for reviews and see what people are saying about that course. You will find many bad reviews for something that is a fraud. But that doesn't mean people will not say anything bad about a legit training program.

You can find some negative comments coming from people who weren't able to make money. This is not always a fault of course. Some of these people didn't make it because they weren't persistent or patient enough. Part of the blame goes to the course providers when they make tall claims. The truth is, any course that can help you make more money than what you have paid for the course is not a scam. You are not getting robbed of your money. Once you get to the breakeven point, it's easier to work hard and become profitable.

Another motive behind a bad review is to make a specific product look bad to make another one look good. The other product is usually a course they want to sell.

## The Modern Millionaires - Why is it not a Scam?

You can look at the business model taught in the Modern Millionaires course and tell that it's not a scam.

If you find a course advocating something that is not in demand, it probably is a scam. For example, a pyramid scheme will hardly mention anything that is in demand. The entire business is based on getting new members on board.

This is not the case with The Modern Millionaires. It uses the "lead flipping" model for making money online. Anyone with a basic understanding of business can tell that lead generation is not a scam. It is one of the hottest skills in the business world. This shows that the course is not a scam, at least as far as the business model is concerned.

## **How much money can you make with lead flipping?**

A very basic understanding of business will tell you that leads are always in demand. That's probably the easiest thing to sell to businesses. You can waste months convincing businesses to use your marketing or advertising service. But when you go to them with a stream of sales-ready leads, they will not waste a second in saying yes. After all, these are potential customers looking to buy from them.

Lead flipping can turn into a very profitable business. You have to understand that it is not a get-rich scheme. You are not going to start making money from day one. That doesn't mean you need to be an expert or guru in your niche (although experience always helps). You can learn and take action as soon as you receive the training, and build momentum over time.

## **Does the course teach you how to generate and flip leads?**

It is one thing to talk about a business idea and another thing to lay out the plan that you can take and put in place. Some courses can make a lot of sense but when it comes to actionable tips, they fall short.

The Modern Millionaires course is different. There's very little theory. More than 90% of the training program consists of practical information.

Spend a few hours going through the second and third module and soon, you will have it figured.

## **Abdul and Chance - Entrepreneurs or Scammers?**

It's hard to differentiate between a true entrepreneur and a con man. The only way to know that is by looking at the businesses in their portfolio. The scammers are usually all talk. Abdul and Chance have several successful businesses. They know what it takes.

Their experience in lead generation has been a driving force to come up with the course. Very few courses can deliver what they promise from day one. The Modern Millionaires does. This is because the coaches understand the pain points and challenges you can face. They will give you the templates and tools to help you hit the ground running.

## **What's the cost in terms of time and money?**

The only drawback of the course is the price. Yet, most legit training programs or memberships are usually on the expensive side. This is because they are looking to make fewer sales instead of accepting everyone on board.

You cannot succeed without getting some help from the founders and group members. And the high paywall stops time-wasters and non-serious persons from wasting everybody's time.

You should be looking to spend something in the range of \$5,000. You will also need a few hours daily. The course is comprehensive but concise. It's not unnecessarily long. This is not a get-rich plan. You will make

money, but you must work at it. And investing your time, effort, and skill to learn the art of entrepreneurship can pay off in the long run.

## **The Modern Millionaires process:**

It's a simple enough plan. Here's what you will have to do.

1. 1. Choose your niche
2. 2. Find prospects or potential buyers (businesses interested in leads)
3. 3. Set up a website or landing page
4. 4. Set up PPC campaigns
5. 5. Set up email marketing or remarketing for lead nurturing
6. 6. Get the leads and sell them to businesses at a profit

The Modern Millionaires promises to teach you the process that Abdul and Chance have used to earn their millions. You will be able to replicate these processes after going through the training.

### **How to get started:**

Getting started is easy. You can apply to be a part of the course by going to the website. They do not accept new members without getting on a call. Once you have signed up, it's just a matter of applying what you are reading.

Plan to invest a few hours every day for a month or two. You will have enough information to get started during this time. You can set an appointment or get on one of their live sessions if you're still struggling after some time.

The coaches will personally work with each member who joins weekly. Even more frequently when required.

### **What kind of skills or knowledge do you need?**

The course is for anybody who understands the basics of business. You will need to reach out to businesses so good communication skills are a plus. Your confidence and ability to set realistic expectations will be the key.

The Modern Millionaires claim that anybody can do this provided they have some basic skills in writing, sales, and business. There's no need to be an IT pro or a genius with coding. If you are average but willing to work hard, you can go far with Abdul and Chance.

Things to remember before signing up for Modern Millionaires:

1. Do not join if you do not have the money or time to invest.
1. Do not get too hung up on the price tag. You will only compare it with other products or programs which have a lower price point but no value at all.
1. Make sure you can communicate well and understand your interests and strengths. If you are a jack of all trades, this course might not be for you.
1. It'll take some doing. Don't expect to wave a magic wand and see the money rolling in. This is a legitimate way to start your own business based on what you love. It's just going to take some effort but the rewards

will be worth it!

1. Be patient. Do not expect instant results. Businesses take time to come on board.
1. Keep an open mind, learn as much as you can from the mentors and use your skills and efforts to make this work for you!
1. Don't get demotivated by the negative reviews. Remember that successful students are busy making money while others complain. When you join their Facebook group, you will see many students who are having some success.

## **A little more about the Modern Millionaires Facebook group:**

The mentors run a Facebook group where you can ask questions and keep in touch with the other students. It is very active because many of the students are engaged and learning something new each day.

You will see many students sharing small and big wins regularly. This will help you realize that this program works.

The mentors have a presence in the group and are always ready to answer your questions. You can ask specifics about your business or random thoughts that pop up during the day.

You are guaranteed their support for as long as you need it. It's a safe, friendly, and fruitful environment.

### **Conclusion:**

You can hire the best mentor or join the best training programs but your success will depend on how determined you are. You will need to build the business from scratch. If you don't have the patience, time, and resources to do it, you should stay away from anything like this.

If you are serious, there's money-to-be-made in this system.
