

The best face-swapping apps

Face swapping is one of many ways to have fun with photos. Online tools and websites allow you to perform face swap edits without needing any advanced photo editing skills.

Face swapping is one of many ways to have fun with photos. Online tools and websites allow you to perform face swap edits without needing any advanced photo editing skills.

Whether you're curious to see what your face would look like swapped with a friend's or want to playfully add an elderly person's face to a baby's body, there are several websites that allow you to do just that. Here are some of the best face-swapping apps currently available.

1. Face Swapper

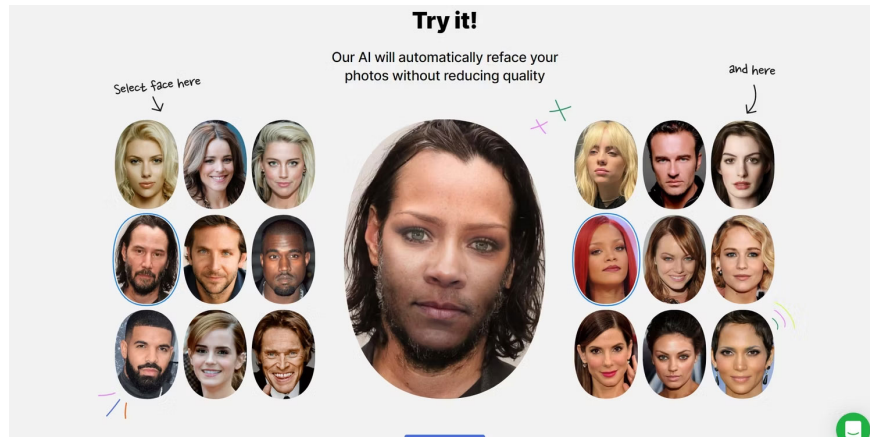

If you're looking for a simple face-swapping tool that doesn't require complicated editing steps, then this is it. Face Swapper has a simple interface that lets you just upload or drag and drop images into it.

After uploading your photo, you will need to select a face from the list of provided images. You can choose to view either male or female faces.

You are not required to choose from the provided list as there is an option to upload the original image for face swapping. After selecting the face you want to swap, click **Swap Face Now**, then download the edited image.

2. Icons8

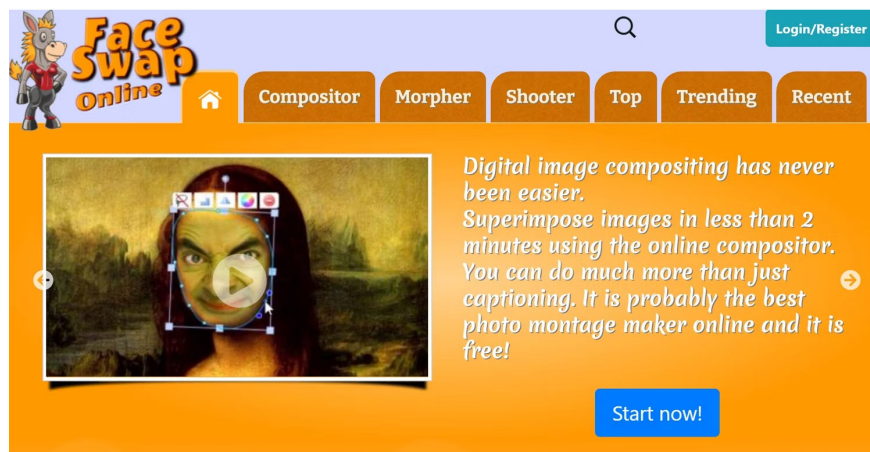

Icons8 is a platform that offers a variety of design tools. Among these tools, you'll find an AI-powered face-swapping tool. This tool allows you to perform high-quality, high-resolution face swaps.

When accessing Face Swapper on Icons8, you can try out this tool by swapping the faces of celebrities on the site. If you want to swap multiple faces at once, you can do so using the multi-face swap feature.

With Icons8 Face Swapper, you simply upload your photos and let the technology do the work. You can access this tool through a 3-day free trial. After that, you can pay \$19/month or \$99/year.

3. Face Swap Online

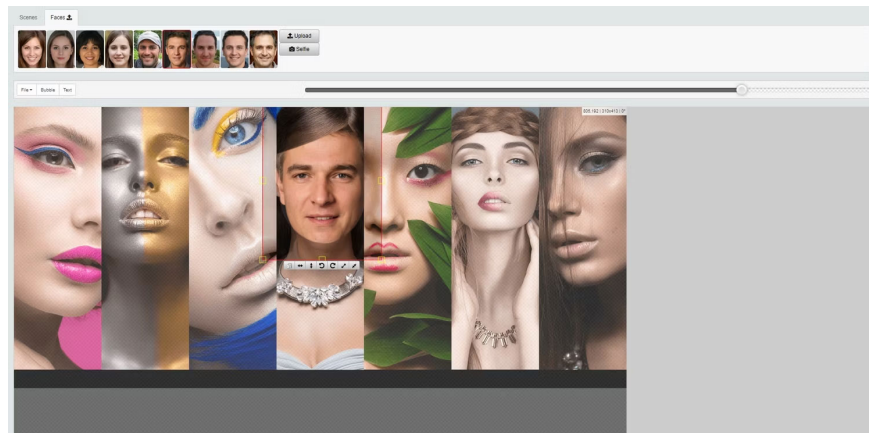

There are quite a few similar automatic face-swapping tools you can access, but Face Swap Online offers something different. Face Swap Online is for anyone who wants to do things manually. Here, you will learn how to perform real face swaps using a composite tool.

If this seems too difficult for you, the good news is you don't have to figure it out on your own. On the Compositor website, you'll find step-by-step illustrations showing you how to insert a face into another image.

You can use the provided editing tools to ensure the images blend together harmoniously. This tool also offers additional stickers that you can add to your face-swapping edits.

4. ChangeFaces.com

ChangeFaces.com is a tool that provides you with a collection of funny photo scenes and allows you to change faces in photos.

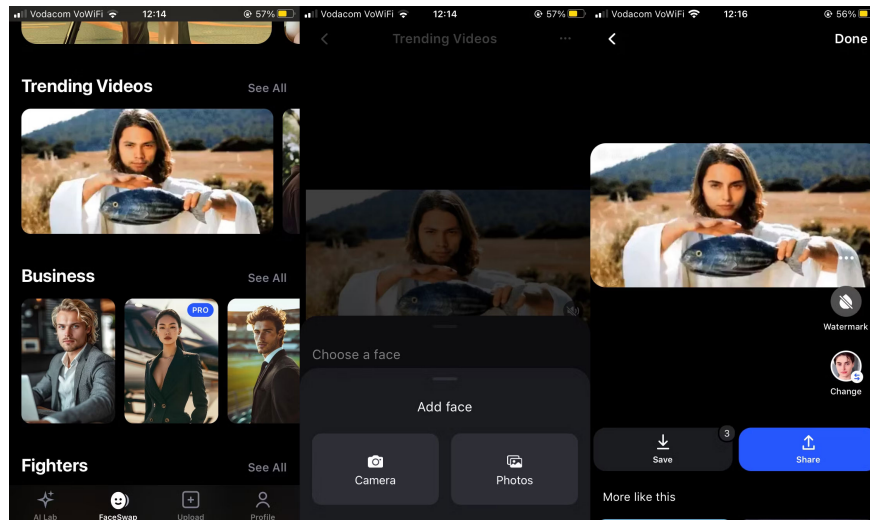

With this tool, you can explore the face-swapping feature in a unique way. You can choose from a set of faces on the website to swap. To add your own images, you can take a selfie or upload photos from your device.

The best part is, some scenes in the photo are group photos, allowing you to change multiple faces. Once finished, you can download the photo in your preferred format and share it with friends.

5. Reface

Reface is the star of AI-powered face-swapping apps. The user interface is very user-friendly, and you get good, fast results. You can not only perform photo face swaps with Reface, but also have a wide selection of video and GIF options to choose from.

Go to the **FaceSwap** section, scroll through the photos and videos, and select your favorite. In the next window, tap the face you just selected and tap the plus sign to take a photo or choose a photo from your photo library. Then, tap **Swap Face** and wait for the result.

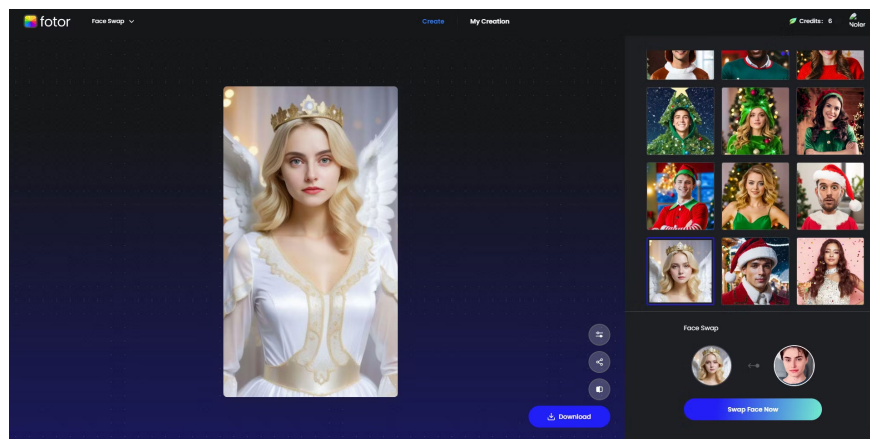

Subscribing will remove all watermarks, eliminate ads, and unlock unlimited access to all photos and videos. You can also purchase lifetime access to premium features for a one-time fee.

1. Download Reface for Android | iOS (Free, subscription available)

6. Fotor Face Swap

Fotor is a browser-based AI photo editing tool because it's equipped with every conceivable tool, including an AI face-swapping tool. And the biggest advantage is that the results are watermark-free.

In the editor, you can select photos from Fotor's library or upload your own. Click the circled plus sign to select another photo and press **Swap Face Now**. The AI ??will combine the two faces, and the result is amazing.

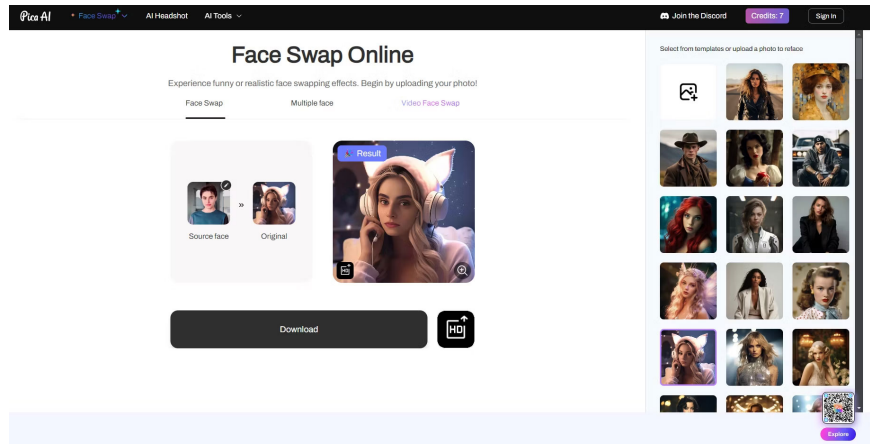

Subscribing to Fotor Pro or Fotor Pro+ will give you more credits to use for AI features. You can also purchase Fotor credits for a one-time fee.

7. Pica AI

Pica AI is another quick and easy online tool for face swapping. It also has several other AI features – the AI ?? Image Enhancer is definitely worth a try.

Choose something from the Pica library or upload your own photo. Click **Add face** to upload a second face and press **Generate** - it takes about 20 seconds to get the perfect blend result. You can also swap multiple faces in one image or perform a video face swap.

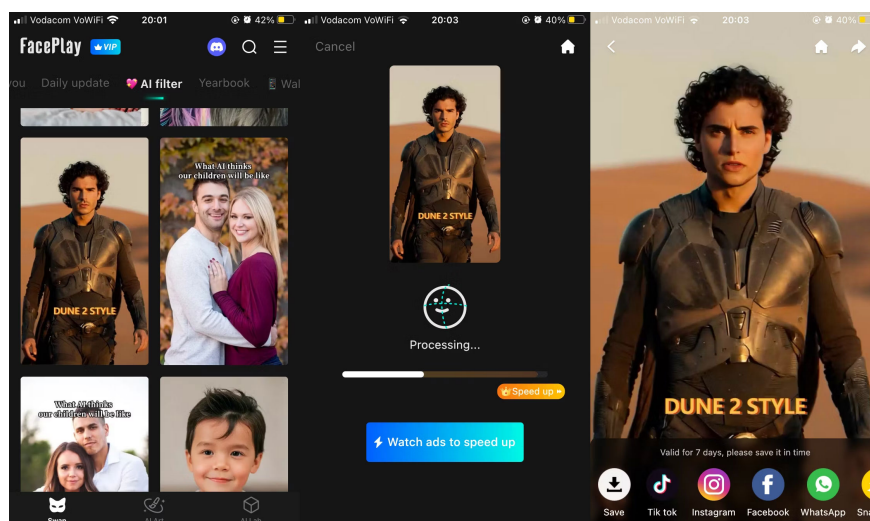

Similar to Fotor, Pica operates on a credit system, so you'll need to subscribe to one of Pica AI's packages for more access. Luckily, you get 8 free credits per day, which is a great deal if you just want to experiment with the tool.

8. FacePlay

FacePlay is an AI-powered face-swapping app that also boasts a huge collection of photos and videos.

In the **Swap** section on the homepage, you can scroll through countless images and animations – some of which show you before and after pictures of them. After selecting your favorite, tap **Free to Use**, then take a photo or choose one from your photo library. Tap **Confirm** and watch the AI ??work its magic.

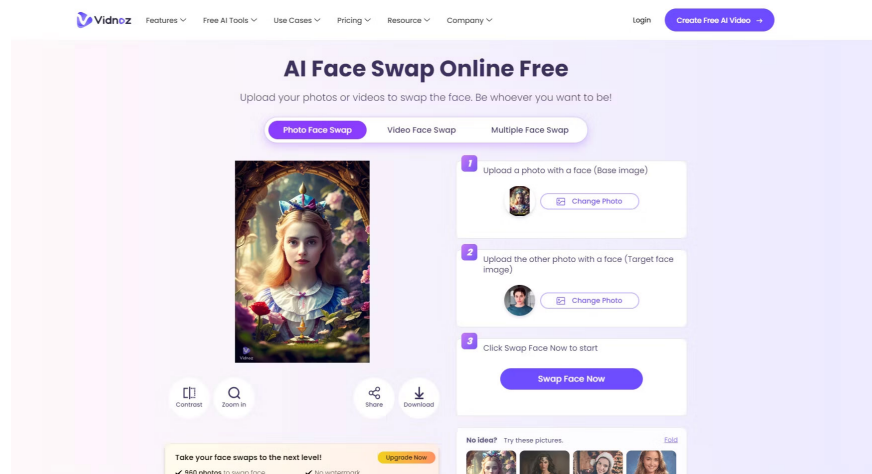

You'll have to watch some ads with the free version and save the results with a small watermark.

1. Download FacePlay for Android | iOS (Free, subscription available)

9. Vidnoz Photo Face Swap

Vidnoz specializes in video editing but also has many AI photo tools – the face-swapping tool being the most interesting feature to use.

Choose one of the photos provided by Vidnoz or click **Upload Photo** in the first box. Do the same for the second photo and press **Swap Face Now**. Soon, you'll be staring at a brand new face.

Vidnoz offers more features with its subscription packages, but you don't need to pay for any of them because the photo face swap feature is free – you just need to subscribe.

Face-swapping apps that don't use AI.

AI-powered applications will yield the best results, but some AI-free options are also worth trying.

1. Funveo

Face swapping is just the tip of the iceberg on Funveo (Banuba on Android); this app is a goldmine of unique filters and masks.

Opening the app will take you straight to the front camera. The layout is similar to Instagram Stories – you can scroll through the filters and masks at the bottom and apply them to your face in real time by taking a photo or recording a video.

To perform a face swap, tap the photo icon in the bottom left and select a photo from your photo library. You'll receive a notification window stating that your free trial for the day has expired, but you can watch a video ad to continue. Tap **Edit**, select a face, and save the new photo.

This app is useful for those who want to take advantage of social media without constant notifications. Subscribing will unlock more filters and remove ads.

1. Download Funveo for Android | iOS (Free, subscription available)

2. Copy Face

Copy Face allows for more accurate face swapping by pasting copies. The downside of this app is the rather limited selection of faces – an upgrade is needed to unlock more.

From the home screen, users can take photos, select photos from their photo library, or choose photos of celebrities. Additionally, check the **Photo of the Week** section to find new faces. In the editor, toggle the face selector and press **Copy** to save the selection. Press **New** and select another photo, find the face selector at the top, and place it on top of the new photo.

 HELP  NEW  COPY  SHARE  SAVE

Your photos will be saved with a watermark, but it's very easy to remove.

If the options in Copy Face aren't suitable, you might also consider Face Swap, developed by the same company – the interface and editing tools are quite similar. Unfortunately, Copy Face isn't available on Android, and it seems Revosoft Technologies has also removed Face Swap from the Play Store.

1. Download Copy Face for iOS (Free, subscription available)

2. Download Face Swap for iOS (Free, subscription available)

The ability to swap faces in seconds without any special skills is perhaps one of the most interesting ways to use AI. So, grab a photo and start exploring these applications today!
