

MONTH function - The function returns the monthly value of a day expressed as a serial number in Excel

MONTH function: The function returns the month of a day expressed as serial number in Excel. Months are represented by integers with values between 1 and 12 months. Syntax: MONTH (serial_number)

The following article introduces you to the **MONTH** function - one of the functions in the date and time group is very popular in Excel.

Hàm Month

Description: The function returns the month of a day expressed as serial number in Excel. Months are represented by integers with values between 1 and 12 months.

Syntax: MONTH (serial_number)

Where **serial_number** is the date denoted by the serial number you want to calculate the month value.

Attention:

- Excel stores the date as a serial number to facilitate the calculation process.
- The return value of the function **YEAR, MONTH, DAY** is a **Gregorian** value regardless of the display format provided.

For example:

Calculate monthly values in days with different formats:

Hàm MINUTE trong Excel		
<i>Nhóm hàm ngày tháng và thời gian</i>		
STT	Giá trị	Giá trị tháng
1	1/1/2016	
2	25-Mar-16	
3	Jul-16	
4	28-Aug-2017	
5	25-Mar	

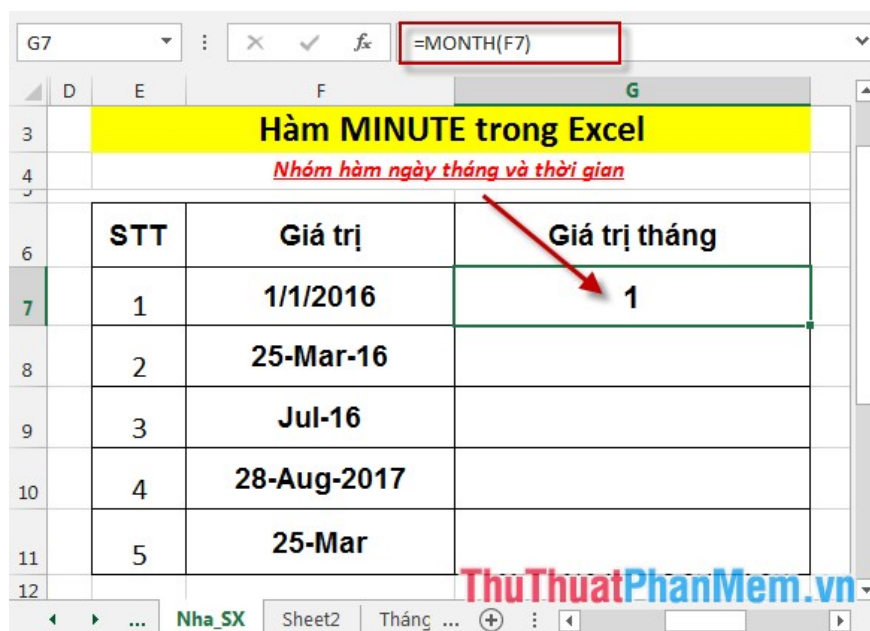

ThuThuatPhanMem.vn

- In the cell to calculate enter the formula: = MONTH (F7).

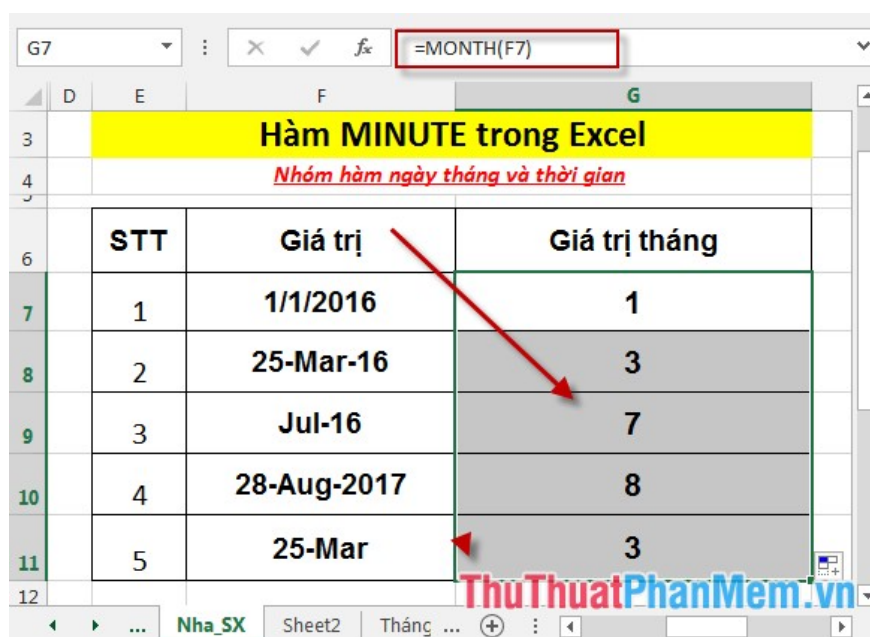

Hàm MINUTE trong Excel		
<i>Nhóm hàm ngày tháng và thời gian</i>		
STT	Giá trị	Giá trị tháng
1	1/1/2016	=MONTH(F7)
2	25-Mar-16	
3	Jul-16	
4	28-Aug-2017	
5	25-Mar	

ThuThuatPhanMem.vn

- Press **Enter** -> return month value is:

- Similarly copying the formula for the remaining values ??results:

Above are instructions and some specific examples when working with the **MONTH** function in Excel.

Good luck!
