

More than 1,000 collective dancing robots break the world record in China

Guinness with the world's largest number of dancing robots at the same time has been set up in China with 1,069 robots, breaking the previous world record of 1,007 robots.

Guinness with the world's largest number of dancing robots at the same time has been set up in China with 1,069 robots, breaking the previous world record of 1,007 robots.

1. Robotic robot with wire mesh construction
2. Robot chat in strange language, threat to humans?

These newly established robots called "**Dobi**" made by WL Intelligent Technology jointly performed a collective dance in Guangzhou, Guangdong Province, China, on August 17.

All these robots are programmed through the group control system, able to perform Tai Chi performances, perform some dancing and talking movements. During the performance, some robots accidentally fall so they are not included in the final result.
