

Mortal Kombat 1 PC configuration will require more than 100GB of free space?

The PC hardware configuration requirements for MK1 are surprisingly low compared to the graphics the game will bring to the player.

NetherRealm Studios' upcoming MK version, **Mortal Kombat 1**, has been announced with a compelling trailer and excites gamers to love fighting games in general and the Mortal Kombat series in particular.

And now, when players have pre-ordered on different platforms, NetherRealm Studios has finally revealed to players that they have the official configuration of Mortal Kombat 1.

Although the upcoming Mortal Kombat will exclusively release a current generation console title without the previous generation port of the game being announced. But the PC hardware configuration requirements for the game are surprisingly low compared to the graphics the game will bring to the player. However, one thing that may surprise many players is the huge data size of the game, which requires 100 GB of free hard drive space.

Mortal Kombat minimum configuration 1

1. **Operating System:** Windows 10 64-bit
2. **Processor:** Intel Core i5-6600 or AMD Ryzen 3 3100 or Ryzen 5 2600
3. **Memory:** 8 GB RAM
4. **Graphics:** Nvidia GeForce GTX 980 or AMD Radeon RX 470 or Intel Arc A750

Although the system's hardware requirements for the game are not very high, the free hard drive requirements are higher than usual when players have to spend 100 GB of HDD or SSD hard drive for this game.

However, this is only the estimated capacity that the developer gives players when launching the game. We still have to see what the actual file size at release is, however, anyone interested in gaming at release may want to invest in expanding their PC's memory.

Mortal Kombat 1 is expected to be released on September 19, 2023 for PlayStation 5, Xbox Series X|S, Nintendo Switch and Windows PC (via Steam and Epic Games Store). With such a large capacity, we may see the appearance of more new characters in this next version of Black Dragon.
