

Motorola RAZR, flexible screen smartphone for the first time shows very impressive real photos

The first images of Motorola RAZR, a new generation smartphone with flexible screen and folding ability of Motorola have been shared by Mobielkopen and technology blogger Evan Blass recently.

The first images of Motorola RAZR, a new generation smartphone with flexible screen and folding ability of Motorola have been shared by Mobielkopen and technology blogger Evan Blass recently.

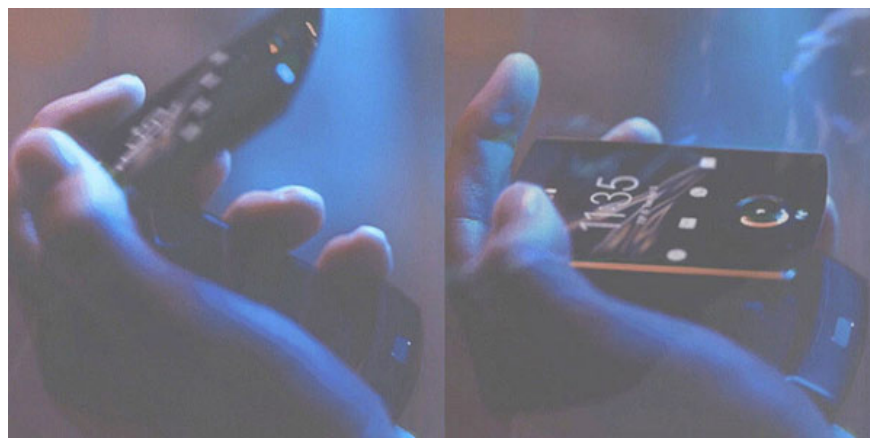

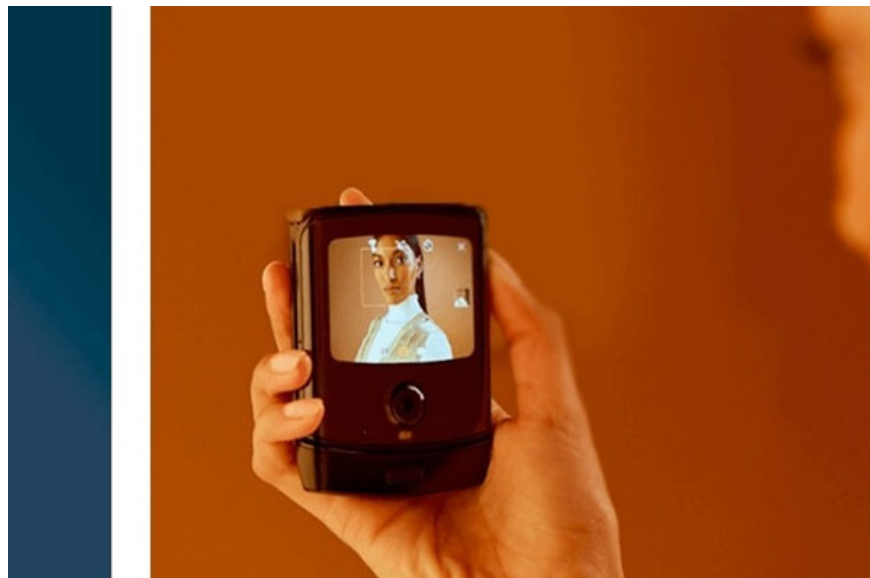

Earlier, Motorola had confirmed it would launch an interesting smartphone before the end of 2020. The return of Motorola and its once legendary design will make the smartphone screen race hotter.

In appearance, Motorola RAZR looks quite similar to the RAZR V3 that was released in 2004. The difference is that the Motorola logo on the front of the RAZR looks smaller and has a fingerprint sensor.

Motorola RAZR will own flexible screen size 6.2 inch OLED, rabbit ears. Thanks to the help of the hinge, this smartphone can also be folded in half. The screen border of the machine is quite thin except the lower border. The front of the device is equipped with a secondary screen size of 2.7 inches.

According to previous reports, Motorola RAZR is equipped with Snapdragon 710 chip, 4GB RAM / 6GB, 64GB / 128GB internal memory. The battery capacity of the device is only 2,730 mAh.

Motorola RAZR is available in white, black and gold and will be available in November 13. The selling price of this product is about USD 1,500 (equivalent to about VND 34.7 million).

1. Galaxy Xcover FieldPro: Super durable smartphone for US agents only
2. Warning: The 'immortal' virus strain appears, capable of automatically reinstalling even if the user reinstalls the original settings
