

# Mouse training game, quick and quick eye game on the computer

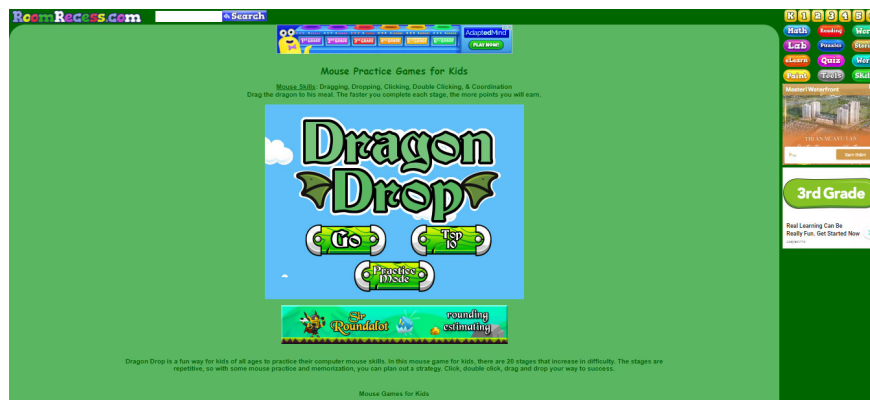

Students can practice their mouse with simple games that will help them use the mouse more quickly.

For computer users who have studied information technology for a long time, using the mouse has become proficient and they can perform work and study on the computer faster.

Computer Science has been a compulsory subject since grade 3. The content of computer science in grade 3 is simply getting familiar with computers, practicing typing, using simple software like Paint, practicing typing with Mario Typing Online.

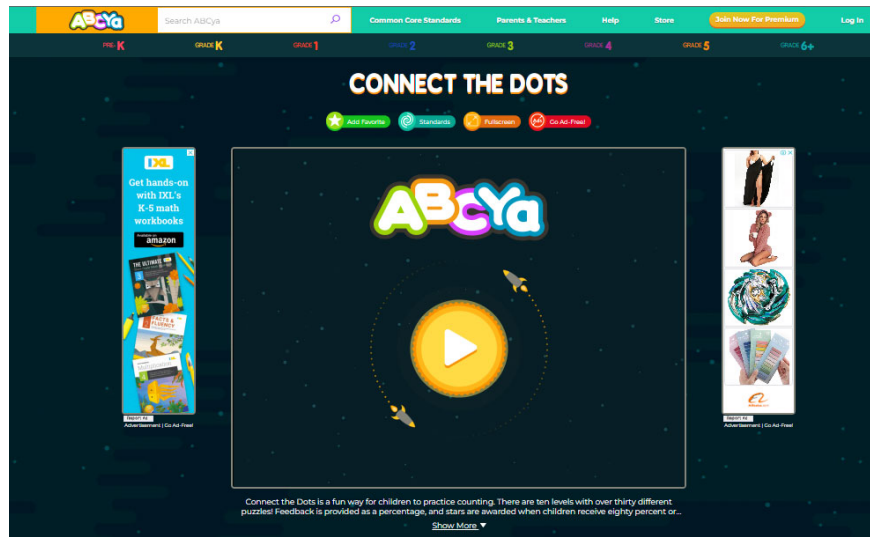

As for practicing using the mouse, students can practice the mouse with simple games that will help them use the mouse more quickly. Below are some games to help students practice their mouse and eyes faster on the computer.

## Dragon Drop

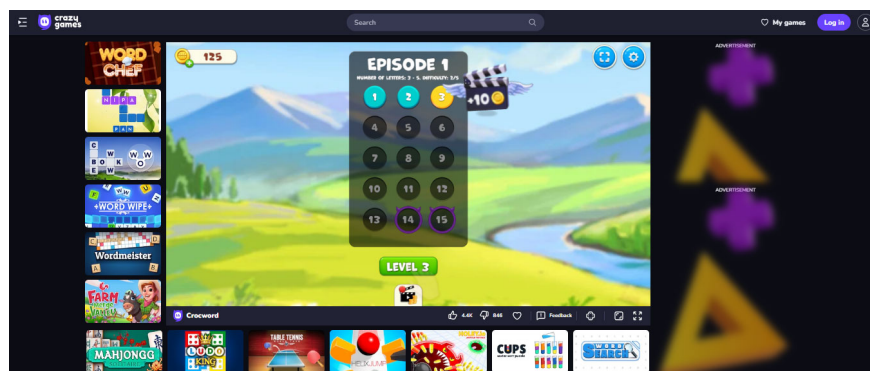

Dragon Drop is a fun way for kids of all ages to practice their mouse skills. In this mouse skills game for children, there are 20 parts with increasing difficulty. Children will practice the skills of clicking, double-clicking, dragging and releasing the mouse. The sections will be repeated, so with just practice and memorization, children can strategize to win.

## Connect the Dots

Connect the Dots is a fun way for children to practice their hand-eye coordination. There are 10 levels with over 30 different puzzles! Feedback is provided as a percentage and stars are awarded when children achieve 80% or more. Hints are provided after 3 wrong tries.

## Crocword Crossword Game

Crocword is a crossword puzzle game in which you need to form words from the given letters. The game helps children practice spelling and practice mouse skills by clicking and dragging to form words.

## Click and Match

### Disney Junior Matching

Games > Mobile Games > Disney Junior Matching

Click on the cards and train your memory with this fun matching game. There are 3 levels from easy to difficult. Children can choose 1 of 3 characters when starting the game. Character selection will determine the theme, background music and images that appear during the game.

## Disney Channel's Snowman-O-Rama

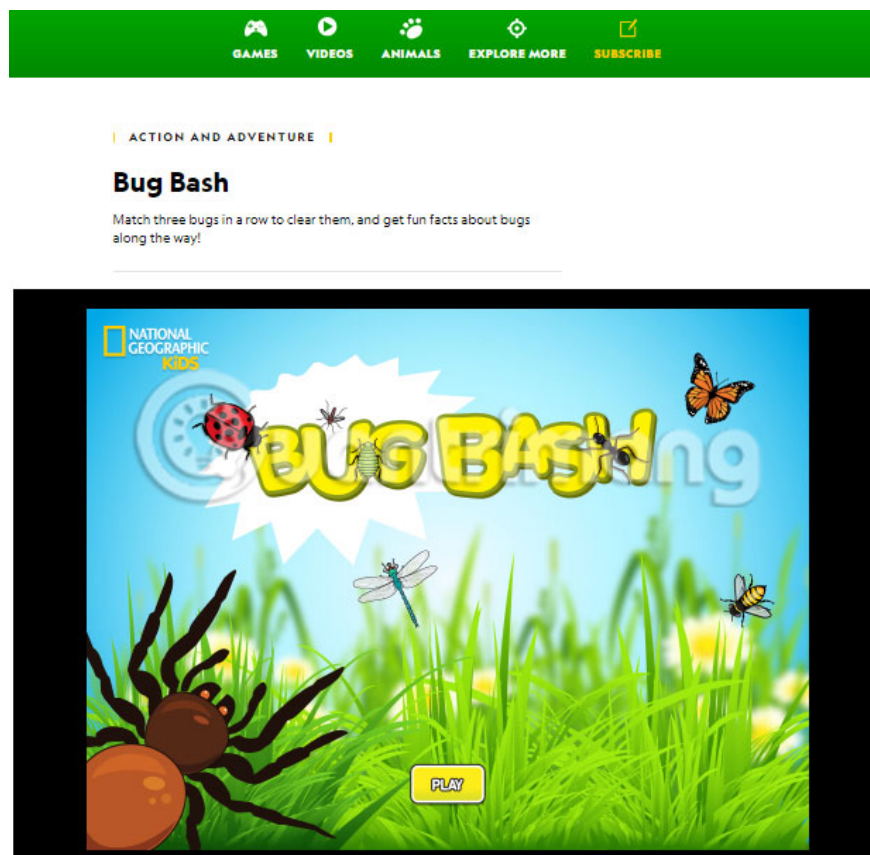

Disney Channel - Snowman-O-Rama is a game on the Disney Channel website that uses some elements from the current series during its release. Drag and drop snow blocks to create the best snowman possible.

## Balloon Pop Subtraction

Solve subtraction problems by clicking on the bubbles to find the answer. Kids will practice both their mouse skills and math skills at the same time!

## Bug Bash Game

Click on the bugs to change their position, so that similar bugs are in the same horizontal or vertical row. When you match three identical bugs in a row, you will make them disappear.

## Train Track Engineers

Kids can explore engineering and spatial concepts as they help Elmo build a series of train tracks to move his train around and through different objects to get to Grover!

Help your Sesame Street friends build the train tracks by using your mouse to drag the track sections into place.

## Quack Snacks

Kids will use their mouse skills to help Chirp deliver berries to Quack in this game.

## Weigh This!

Click on the weights to balance and calculate how much each object weighs. The game has a total of 20 levels to complete with no time limit. If you don't know how to play, you can click on the instruction text on the game's main menu. You can also click Video to see an overview video of how to play this game.

With these games, you can not only train your mouse quickly but also react quickly to the requirements of the games.
