

Move the clock to the end of the Taskbar on Windows 10.

Moving the clock to the end of the Taskbar on Windows 10 will help restore the original Windows user experience, but to perform this trick, you need the help of special software.

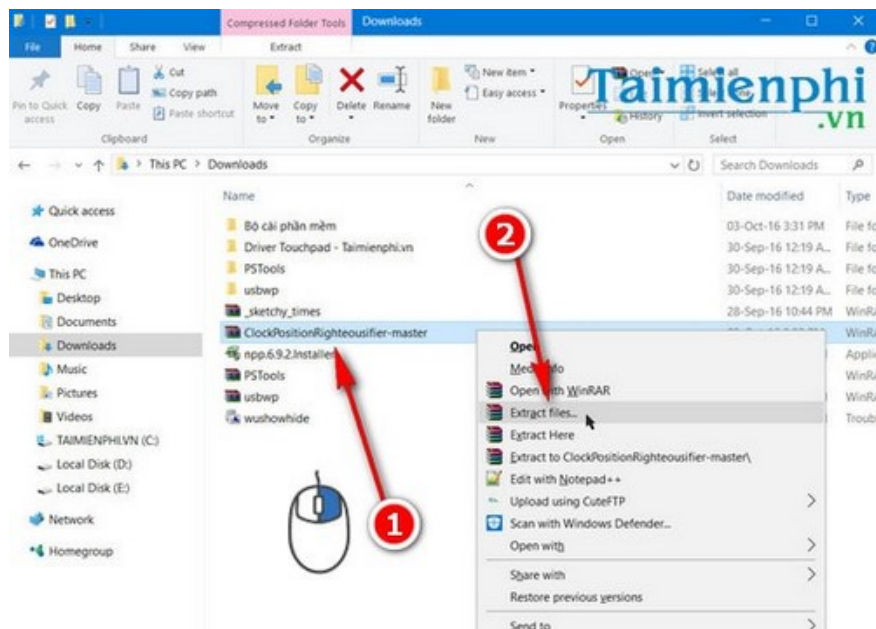

Are you annoyed by the clock icon moving to a new position on Windows 10, next to the Action Center? How can you restore it and move it back to the bottom of the Taskbar like in previous operating systems? All the answers are in this guide from TipsMake.

First, keep in mind that you can hide the system tray icon on Windows 10 to remove the Action Center and move the clock icon to the end of the list, but that's not feasible as the Action Center is quite useful.

Move the clock to the end of the Taskbar on Windows 10.

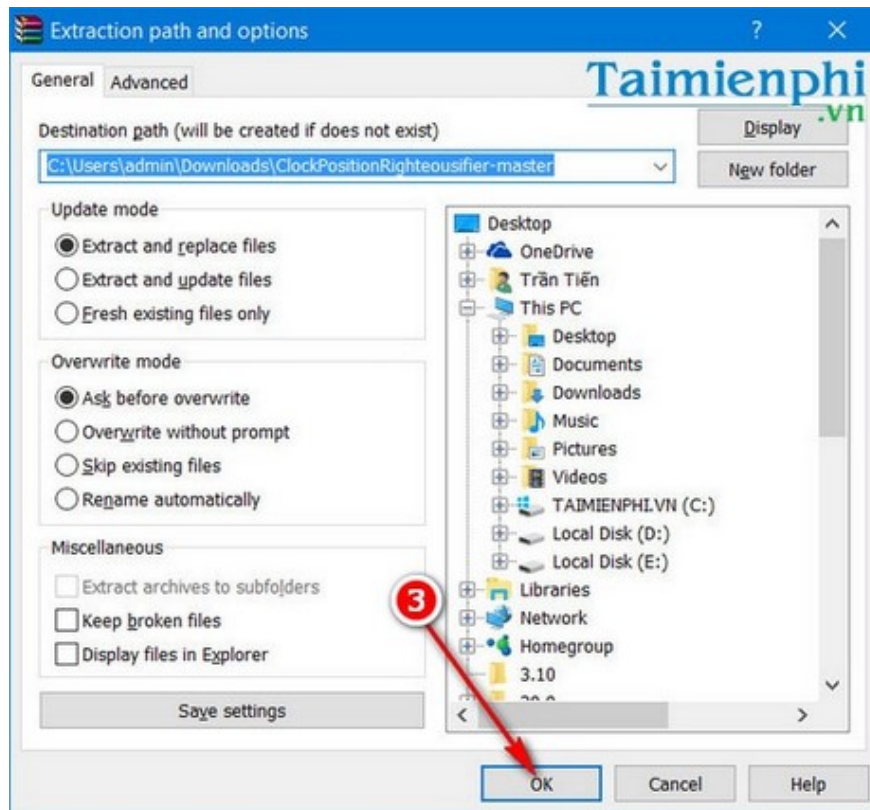

To move the clock to the bottom of the Taskbar on Windows 10, you need to download the ClockPositionRighteousifier tool to your computer . If you are running Windows 10 32-bit, access the CPR_x86 folder; conversely, if you are running the 64-bit version, access the CPR_x64 folder.

Step 1: Extract and open the installer.

Instructions on moving the clock to the end of the Taskbar on Windows 10

Press **OK** to confirm extraction.

Step 2: Access the following link to find the 64-bit installation file:

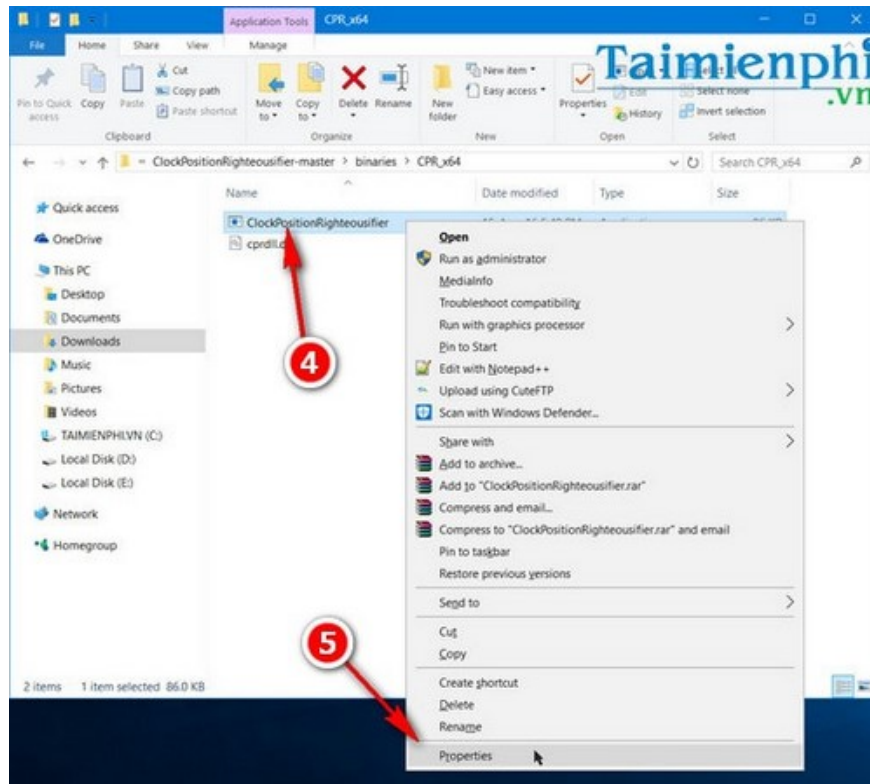

C:\Users\xxxx\Downloads\ClockPositionRighteousifier-master\ClockPositionRighteousifier-masterbinariesCPR_x64

Access the 32-bit installation file via the link below:

C:\Users\xxxx\Downloads\ClockPositionRighteousifier-master\ClockPositionRighteousifier-masterbinariesCPR_x86

Where: xxxx is the user account name.

- Right-click on the installation file: **ClockPositionRighteousifier.exe** > select **Properties** > uncheck **Unblock (if available)** > click **OK** .

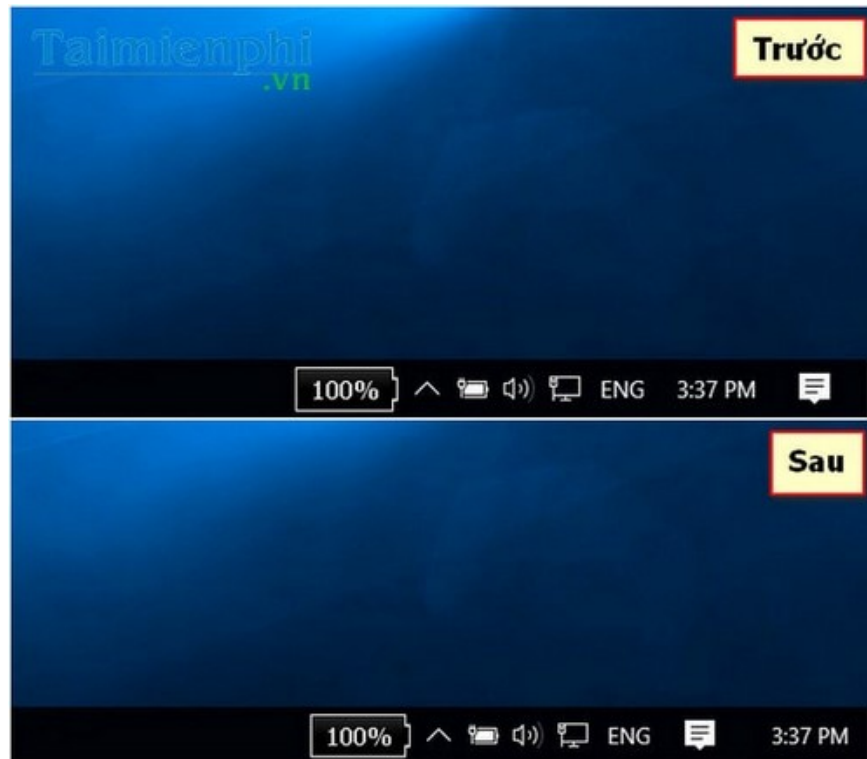

Instructions on how to move the clock to the end of the Taskbar on Windows 10.

Repeat the above steps with the cprdll.dll file (if present).

Step 3: Launch the **ClockPositionRighteousifier.exe** installation file .

After the launch is complete, the clock and Action Center will automatically swap places before and after the clock and Action Center are swapped.

To revert the changes, simply click the .exe file again to undo them.

This free software application is developed by the renowned file management software developer Directory Lister Pro . Therefore, you can rest assured about the reliability of this software when editing your system on Windows 10.

After using Windows 10 for a while, users may encounter some rather annoying Windows 10 errors that prevent them from having the best experience. However, the most common Windows 10 errors are not as bothersome as the clock icon being in a different position on the Taskbar, creating an unfamiliar feeling for users.

As mentioned, besides clicking the system tray icon on Windows 10 to resolve this issue, users can also perform some interesting tricks with the Taskbar to optimize this tool, such as pinning folders to the Taskbar on Windows 10 to quickly open desired folders without having to go to File Explorer.
