

Mozilla released Firefox 64 with some interesting new features

Firefox 64, the latest version of the Firefox browser for desktop and Android comes with many convenient features that allow users to manage tabs professionally and extensions that are more advanced, just released. eyes today.

Firefox 64, the latest version of the Firefox browser for Android and Android comes with many convenient features that allow users to manage tabs professionally and more "extensions" just recently. was released today.

Mozilla said that when browsing the web on Firefox in public mode, the browser will rely on the way users use to make suggestions for new related services and extensions. This feature is not based on activity history and does not track users when in private browsing mode.

For example, if you regularly use Google Translate, Firefox will recommend this tool to Google for you.

In addition, Firefox 64 has a new feature called "enhanced tab management" - advanced tab management, which allows users to group tab tabs together to move and close, mark or pin them.

Task Manager - The task manager in this new version is also updated to allow users to know the power consumption of each individual tab. From there you can know which specialized tasks consume a lot of battery when using a Android laptop or smartphone.

Firefox 64 for Android has also improved roll speed and performance.

Currently, users can update the developer version of Firefox immediately with all the above features.

To check the version of Firefox on your device, users access Menu -> Help -> select About Firefox. The browser will check itself and download an updated version of Firefox.
