

MSI comes to a gaming laptop for \$ 2,500

GT783 uses 2.2GHz Intel Core i7-2670QM chip, Nvidia GeForce GTX 580M graphics card, up to 16GB RAM and 128GB SSD and 750GB HDD.

GT783 uses 2.2GHz Intel Core i7-2670QM chip, Nvidia GeForce GTX 580M graphics card, up to 16GB RAM and 128GB SSD and 750GB HDD.

Taiwanese manufacturer MSI is about to launch its high-end laptop model GT783. This product is aimed at the gaming computer market.

GT783 has a selling price of up to 2,500 USD.

MSI GT783 uses Intel Sandy Bridge Core i7-2670QM processor clocked at 2.2GHz, up to 3.1GHz thanks to Turbo Boost 2.0 feature. MSI's new laptop model is equipped with an anti-reflective screen with a size of 17.3, a resolution of 1,920 x 1080 pixels. GT783 uses Nvidia GeForce GTX 580M GPU with 2GB VR5 VRAM. DDR3 RAM memory of the machine can be up to a maximum of 16GB while the SSD is 128GB. HDD drives follow the device with a capacity of 750GB and a rotation speed of 7,200 rpm.

MSI's latest gaming laptop supports 802.11 Wi-Fi b / g / n, Bluetooth, HDMI and memory card reader. It has 2 ports for each USB 2.0 and 3.0 connection. In addition, the GT783 also includes a webcam for 720p video recording. This model runs on 64-bit Windows 7 Home Premium and comes with a 9-cell Lithium-ion battery. It has a THX TruStudio Pro audio system with Dynaudio premium speaker (with subwoofer) and built-in Blu-ray

drive. The price of the above product is USD 2,499.99.
