The new product was released by Taiwanese company and announced that this product is aimed at users who want to create their own style and powerful requirements for configuration and function for a laptop.

With the price from 940 USD (in the UK market), FX600 is equipped with a configuration including Intel Core i3-330M processor with 2.13GHz speed, 4GB RAM, Nvidia GeForce GT325M graphics card with 1GB DDR3 and hard drive up to 500GB.

MSI's new product comes with 4-speaker THX TruStudio system with surround sound settings, Cinema Pro technology optimized for personal entertainment such as listening to music, watching movies directly on the device. However, the screen size of 15.6 inches resolution of 1366 x 768 pixels of FX600 only supports good HD video playback, while want to enjoy Full HD 1080p video, users will have to use HDMI cable TVHD.

The FX600 is designed with a scratch-resistant, shock-proof and black-colored case to choose from the same

chiclet keyboard, large multi-touch touchpad. FX600 will be sold by MSI this month.
