

MSI GF Series Laptop - Exquisite design - Optimal performance

GF series brings users a mobile and highly aesthetic product thanks to its thin and light design, while still having a good price.

With countless hot game titles constantly being released, the gaming laptop market is also becoming equally bustling. If you want to play those games, but don't want to spend too much on a Gaming laptop, **the MSI GF Series** is the laptop line that is worth the price.

1. Review of MSI GF Series design

In terms of design, the MSI GF Series Laptop is not much different from the company's other low-cost product lines. Still with a plastic shell design, the GF Series has a size and weight almost equivalent to the products in the GP version. Specifically, with the GF65, we have a thickness of 21.7mm but a weight of only about 1.86kg. Compared to other gaming laptops in the same segment, the weight of the GF Series can be said to be the lightest.

2. Keyboard and touchpad

The keyboard of MSI GF Series laptop has a fairly short key travel, but the response is good so it will still bring a good typing experience. However, if you are not used to it, it will take some time to get used to the keyboard of this machine.

The touchpad has a smooth surface that feels good to use, but the sensitivity is only average and nothing too outstanding. Of course, for a Gaming Laptop, owning an external mouse is a must, so the touchpad is probably only used in cases that are not too important.

3. About the screen

Although the GF Series screen is not high-end, it still meets the needs of work and entertainment with quite good image quality. Typically, the MSI GF63 is equipped with a 15.6-inch screen, FHD 16: 9 resolution, combined with an IPS panel, so the image quality meets the needs of normal use. The advantages include beautiful screen colors, high contrast, wide viewing angles, and good indoor and outdoor use.

4. Gaming performance

MSI Gaming GF63 9RCX 646VN Laptop is the cheapest product of MSI GF Series on sale at HACOM. For less than 19 million, you get a machine with Core i5 9300H processor, 8GB DDR4 (2666Mhz) internal memory, GeForce® GTX 1050Ti 4GB VGA and 512GB NVMe PCIe SSD hard drive. Up to now, GTX 1050TI is still a relatively powerful graphics card, helping you to play all games at basic settings. Actual testing on games, we have the following results:

It can be seen that, the representative of the MSI GF Series Laptop line is the GF 639RCX, which has relatively good gaming performance despite being a low-cost product. In basic online games such as League of Legends or CS:GO, the FPS level reaches approximately 100 fps/s. Meanwhile, in a more demanding game like PUBG, it still maintains above 50 fps.

5. MSI GF Series Laptop is the most worth buying for gamers

1. Incredible graphics power from NVIDIA RTX 3000 series VGA in MSI Gaming GF65 Thin Laptop:

MOBILE DESIGN

The MSI GF65 Thin has a 15-inch screen but has a compact design equivalent to traditional 41-inch laptops thanks to the screen edges being as thin as possible.

Latest 10th Gen CPUs - Breaking All Limits

The MSI GF65 Thin laptop is equipped with the latest generation of multi-core Intel processors for up to 40% higher performance than the previous generation thanks to high-frequency processing speed.

State-of-the-art NVIDIA graphics cards

MSI GF65 Thin laptop is equipped with a state-of-the-art graphics card that improves graphics processing performance by up to 40%, effectively increasing the number of frames per second for today's hottest games.

Ultra-thin sharp screen

With a 15.6-inch Full HD display, the MSI GF65 Thin brings users into the world of moving games with every detail of the image thanks to a wide color gamut of 100% sRGB. The brighter IPS panel and wider viewing angle of 170 degrees allow players to comfortably change their sitting position while still being able to see every detail clearly.

BATTERY UP TO 7H

The battery life can be up to 7 hours, ready to meet all your entertainment needs. You can choose from 2 versions currently available at TipsMake here:

1. Outstanding and impressive new design of MSI Gaming GF63 Laptop series

MSI Gaming GF63 inherits the highly appreciated design of its predecessor. The design is characterized by gaming with traditional black color. The MSI Dragon logo 'red dragon' stands out on the case made of brushed Aluminum material with a strong gamer style.

Screen

This MSI laptop model has an ultra-thin bezel in a 15.6" frame, along with FullHD resolution for realistic and sharp image quality. The MSI Gaming GF63 has a 144Hz screen for smooth in-game movements, suitable for gamers who are passionate about FPS games. IPS technology for wide viewing angles, the gaming experience on this laptop will be extremely different.

Thin Bezel

IPS Level Panel

MSI GF63 Thin 10SCSR Performance

MSI Gaming GF63's configuration is invested by MSI to become a true warrior when compared to other products in the same segment. With the 10th generation Intel Core i processor, the machine ensures full handling of light multitasking tasks for users without encountering a state of freezing.

Along with the CPU performance, it is impossible not to mention the Nvidia GTX 1600 series graphics card with impressive performance in its price range. With the power of the GPU, the hottest online games today such as PUBG, COD Warzone, Apex, . have never been an obstacle for the MSI Gaming GF63. If you are a gamer who is passionate about other offline action games, the machine still provides impressive performance without experiencing FPS drops if set at the appropriate graphics level.

In addition to the above combo, the machine still supports multitasking with 8GB or 16 DDR4 RAM, expandable up to 64GB. MSI GF63 Thin also supports high-speed SSD memory and users can equip an additional HDD if they have high storage needs at work.

Keyboard and Touchpad

The MSI GF63 Thin continues MSI's tradition with a keyboard equipped with a red LED that stands out on a black background. The layout is familiar with moderate key spacing. The keycap has a raised edge on top to increase typing accuracy, providing good support for work and gaming. The touchpad supports multi-touch with a large size. The palm rest is also quite comfortable as MSI laptops are almost all carefully calculated for the most convenience for users.

Battery life

Equipped with a 3-Cell 51WHr battery, the MSI GF63 Thin Gen10th can last up to 7 hours (depending on the task the user uses, the battery life may vary). With such a long battery life, if you accidentally forget to charge the device when using it in a public place, you don't need to worry too much.

Extended connectivity

MSI GF63 Thin 10SCXR is designed for gamers and also supports work. Therefore, popular connection ports are still kept on this product line, including: 3 USB Type A 3.1 ports, HDMI image output port, 1 USB Type C port, 1 Mini-DisplayPort port and 3.5mm jack.

This is a multi-purpose gaming laptop model that serves gamers and those who only use it for work support tasks can use it with a compact, unique design. You can refer to the 2 versions available at TipsMake here:
