Taiwanese manufacturer MSI has just upgraded two gaming laptops GT60 and GT70. Specifically, these two products will be equipped with Nvidia GeForce GTX680M graphics card with 4GB VRAM instead of GTX670M as before.

MSI GT60 and GT70 have 1,920 x 1,080 pixel HD screen resolution with dimensions of 17.3 and 15.6 inches respectively. These two models are equipped with Core i7-3610QM processors, keyboards manufactured by SteelSeries and THX audio technology. The GT70 comes with 16GB of RAM while the GT60 is 12GB. Two machines have the same HDD capacity of 750GB.

The reference price for the new MSI GT70 and GT60 models is USD 2,599 (equivalent to VND 54.1 million) and USD 1,899 (equivalent to VND 39.5 million).
