MSI has just introduced three new GT70 models with more advanced graphics, Nvidia GeForce GTX 675M, including: GT70 0ND-204US, GT70 0ND-219US and GT70 0ND-202US .

In terms of configuration, all three are equipped with quad-core processor Core i7-3610QM, screen anti-glare resolution of 1,920 x 1080 pixels, Windows 7 Home Premium operating system, connecting HDMI with 720p webcam. GT70 0ND-204US and GT70 0ND-219US use 4GB GDDR5 graphics memory and GT70 0ND-202US is 2GB. The prices of these three models are \$ 2,199.99, \$ 1,999.99 and USD 1,749.99 respectively.

The first generation of this product was launched by the Taiwanese manufacturer in late April this year. This product originally used only Nvidia GeForce GTX 670M card.
