The CX705MX is equipped with an ATI Radeon HD 545V discrete graphics card, a powerful solution to help this popular notebook run HD videos on a 1600x900 resolution screen.

Other components include Intel Core 2 Duo processor, 250GB, 320GB or 500GB hard drive, 4-in-1 memory card reader, HDMI output, three USB ports, wifi, bluetooth 2.1, 1.3MP webcam and built-in Windows 7 Home Premium.

The CX705MX also integrates the energy-saving ECO Engine Power Saving technology, allowing users to select five power consumption modes in different modes such as playing video games, watching movies or word processing. This large notebook weighs about 3kg.

Currently, MSI has not announced the selling price of CX705MX.
