

MSI launches new gaming desktop series with powerful configuration and impressive design

MSI has quickly launched the new generation Trident and Infinite desktop computers, using Comet Lake S chip and Nvidia RTX GPU.

A few days ago, Intel officially announced the new line of 10-generation desktop CPUs Comet Lake S comes with some very noticeable improvements focusing on performance, with turbo clock up to 5, 3GHz and hyper-threading support. The arrival of the new generation Intel desktop chip has immediately created an interesting rivalry in the world of desktop in particular and gaming desktop in general.

In order to gain an early competitive advantage in the market, MSI has quickly launched the new generation of Trident and Infinite desktop computers, using Comet Lake S chip and Nvidia RTX GPU, promising for good processing performance. same impressive design.

The MSI Trident product line will include three models: Trident X, Trident A and Trident 3. These PC models all possess top specifications, combined with designs that have many similarities with gaming console devices, powerful cut lines combined with LEDs for eye-catching effects, can even act as a decoration in the room.

Trident X, the highest model, is equipped with Intel Core i9-10900K CPU, Nvidia RTX 2080, 64GB RAM, 2 M.2 SSD slots and 2 2.5-inch hard drive bays. Trident A and Trident 3, respectively, in the lower segments, with maximum configuration including Core i7-10700 CPU and RTX 2060 Super, as well as only one M.2 SSD slot and a 2.5 inch hard drive bay.

Trident X

As for the Infinite lineup, there are 3 models spread across 3 different price segments, including Infinite X, Infinite and Infinite S. In terms of design, Infinite PC models look "gentler" than their sibling above, and A bit of a traditional desktop desktop, but also has an equally competitive configuration.

Infinite X leads the pack with Intel Core i9-10900K and Nvidia RTX 2080 Super, which comes with two M.2 slots, two 2.5-inch hard drive bays, a 3.5-inch hard drive bay, as well as four slots. RAM supports up to 128GB. The other two models, Infinite and Infinite S, have the maximum configuration with Intel Core i7-10700 CPU, RTX 2060 Super GPU, 64GB RAM, only 1 M.2 slot and 1 2.5 inch hard drive bay.

Infinite X

All of these PCs will be available in late May. However, MSI has yet to announce a specific price.
