

MSI X-Slim X600 saves power

Taiwanese computer manufacturer MSI has just introduced the new ultra-thin X-Slim X600 Pro notebook with a 15.6-inch screen but has not yet announced the price and date of sale.

Taiwanese computer manufacturer MSI has just introduced the new ultra-thin X-Slim X600 Pro notebook with a 15.6-inch screen but has not yet announced the price and date of sale.

It uses ATI Mobility Radeon HD 4330 graphics processor and HDD Sata storage drive with capacities up to 640 GB in 2.5 inch size.

X-Slim X600 Pro

Technologies that support Gigabit LAN and 802.11bgn WiFi connectivity, HDMI, D-Sub ports, 2 USB ports are all included on this product. In addition, Bluetooth wireless connectivity, a card reader and a 1.3 MP webcam will meet your work and entertainment needs on the X600.

Users can choose a 6-cell or 9-cell battery for their products but the manufacturer does not disclose the battery life. X600 is distributed with the Windows 7 home premium operating system. It weighs 2kg, 2.5cm thick and uses Intel's CULV power-saving dual-core processor.
