

# Multiple choice questions on multimedia technology have answers

Multiple choice questions on multimedia technology have answers.

1. Question 1. Definition What is CBT (Computer based training)?
  1. Is E-Learning has multimedia
  2. Is multimedia user learning help
  3. Training methods using computers, interactive systems
  4. Learn with electronic computers
2. Question 2. The width of the bandwidth (bandwidth)
  1. Is the ability to communicate over time
  2. Is the concept of the amount of data transmitted via cable or communication channel
  3. Is the size of the transmission line
  4. The degree to which data is allowed to pass through the line
3. Question 3. Animation (animation)
  1. Is the video
  2. Is a set of static images, to create special effects
  3. Is simulated motion of objects using computers or video effects
  4. Movie for children
4. Question 4. Digitized data
  1. Data describing the digital world
  2. Data is processed by the computer
  3. Data in a numerical manner, the signal is converted to a sequence of numbers; Numbers are stored and transmitted
  4. Data on the transmission line
5. Question 5. Similar data
  1. Data in the same way, the signal is saved and transmitted directly
  2. Data used in computers
  3. Real world simulation data
  4. Text data
6. Question 6. Concept of DPI
  1. Digital Program Interface
  2. Smoothness of digital cameras
  3. Pixel number on the printer
  4. Dot Per Inch
7. Question 7. Distance learning
  1. Learning by mail
  2. Learning under CD-ROM
  3. Is the self-study process, with the help of electronic computers
  - 4.

Studying but studying students' courses follow the teaching environment directly, but follow the distance distribution route.

8. Question 8. Copyright
  1. Signs cannot be copied
  2. Protection of intellectual products in multimedia
  3. Copyright protection
  4. Be the creator's copyright for art, music . and control profits for products
9. Question 9. CD-ROM
  1. CD reader, allows reading multimedia data
  2. Data recording disc
  3. Music record disc
  4. Read-only memory, allows recording multimedia data, from sound to animation
10. Question 10. The term Cartogram in multimedia
  1. Is a multimedia information scheme
  2. A type of description according to the map of statistical information according to the schema
  3. A description of a scenario that links multimedia events
  4. Is the map the script
11. Question 11. Browser (browser)
  1. Software that allows reading multimedia data
  2. Is the application on the INTERNET
  3. An application software that allows users to view and interact with documents, images, video clips, music, games and other information on a web site of a global web address or intranet
  4. Part of the software allows browsing through resources, in different types of data
12. Question 12. Bitmap
  1. Is the bit map
  2. Is the image data
  3. A type of data used in a map database, representing images according to a set of data bits
  4. A graphic that displays images in pixels of pixels, usually top-down, left-to-right
13. Question 13. WYSIWYG, What You See Is What You Get
  1. The standard in WINDOWS of Microsoft
  2. Is a requirement for human-machine interaction
  3. Is describing the immediate effect seen
  4. Is the multimedia term, describing the user interface
14. Question 14. Who called Hacker (hackers)?
  1. Is the system programmer that allows secret access
  2. Users in illegal multimedia interface
  3. User is unfriendly
  4. As a user of information technology skills that generate viruses, or computer intrusion is not allowed
15. Question 15. Interactive video (Interactive video)
  1. Is interactive use of video, audio and video distribution
  2. Interactive videos are digital videos that support user interaction through gestures, voice, touch, and clicks.
  3. Video used in the game
  4. Video for training
