

Music timer on Youtube

The YouTube music timer will help you not to consume much battery power if you accidentally listen to a playlist or a long story on YouTube and oversleep.

YouTube music application off the screen is no stranger to many people. Many contents on YouTube that users want to listen to such as long-duration songs, playlists and especially stories such as love stories, swordplay stories, detective stories, ghost stories .

Often with good stories or long songs. You will listen at night, especially stories and lullaby music. But if you forget, they will definitely consume your battery capacity when you wake up in the morning.

So you can set the time to turn off music in these applications, one of the two most commonly used applications are YouListen and Music Pro. These are the two popular YouTube music off screen applications that are used by many people. To schedule YouTube music off on these two applications, follow the instructions below.

How to schedule YouTube music off on phone

Step 1: When you have selected the music you want to listen, click the song below, in the music player interface, click the clock icon as in the upper left corner.
