

# My WIFI Router - Free and convenient Wifi Broadcasting Software

My WIFI Router is a software that turns Laptop or desktop computers with Wifi Card into an easy wifi hotspot. Free, effective, fast and no junk software.

**Wifi or turn your computer into a Wifi hotspot** - Wifi Router is quite popular demand today. As laptops and some newer desktops have Wifi Card to use wireless networks. On the other hand, devices such as smartphones, tablets, . need to catch Wifi to access the Internet.

In the previous articles I have introduced a fairly professional wifi transmitter software, many features are Connectify. However, Connectify is a very expensive paid software, and the free version of Connectify Hotspot has limited playback time, about Therefore also quite inhibited.

So in this article I introduce a **software that helps you broadcast wifi from Windows XP, Windows 7, 8, 8.1, 10 computers easily: My WIFI Router.**

## Introducing My WIFI Router

---

**My WIFI Router** is a free Wifi hotspot generator, you can use it on Windows XP, 7 and 8 laptops / desktops with Simple Wifi Card with one click. You can easily share internet connection with your friends and colleagues anytime and anywhere.
