In southern Egypt, it was discovered that an ancient ancient coin printed with an "alien" image made many believe that this was evidence of the existence of extraterrestrial beings.

Aliens that really existed are always a mystery to us but there are many people who believe in their existence. Even some people say they have seen unidentified flying objects, abducted by aliens .

A group of people in southern Egypt discovered an ancient alien coin while renovating an old house, according to the Mysteriousearth site. The front of this coin has a picture that resembles a human form but is quite similar to the alien in our imagination and in Latin. The back of the coin is engraved like a flying saucer and the forest below. In addition, this coin looks like it was a very old age.

So far no one has been able to explain where this mysterious currency comes from. Did aliens have come to Earth and quietly quietly lived among us for a long time?

It is still a mysterious question for our humanity. Do you think these mysterious ancient coins are really alien?

1. Aliens never answer us
2. Why didn't NASA intend to return to the Moon?
