

# Mysterious creatures 'dance' strange dance when someone touches it

Seeing the 'strange object' on the tree, the curious man touched his hand and was startled to see its reaction.

Seeing the 'strange object' on the tree, the curious man touched his hand and was startled to see its reaction.

1. Discover 5 strange creatures than even science fiction novels
2. The strange creature re-grows its head, turning its prey into water
3. Hybrid between giant spiders and scorpions, this furry exotic creature is the fear of many people

In the natural world, to survive every animal has different ways of self-defense. Some creatures have extremely unique ways of escape such as Malaysian ants 'bombing' suicide, fake Opat weasels, thorn lizards spraying blood from the eyes . but the self-defense of strange creatures in the video below This is sure you have never witnessed.

The strange creature in the main video is a nest of dozens of bee larvae that bite the leaves, a segment of the insect wing (Sawflies). Yellow larvae huddled together on the trunk of the tree made many people look in fear. Especially when the video recorder approached, they suddenly jerked back and forth like a warning sign 'not coming near'.

That strange 'dance' is the way to protect yourself when you see their danger. If there is only one individual they will easily become food for birds and spiders. Meanwhile, if 'gathering' into a group, they can scare the enemy from afar, the chance to earn a living and survive.

Adam Pomerantz, 27, was fortunate to record this strange scene in Tabopata, Peru, in August.
