

Nano memory card memory card, solution for smartphones not equipped with memory card slot

At the launch of the Mate 20 smartphone launch in London, Huawei Mate introduced a new enhancement to storage memory. It is Nano Memory Card, memory card in the format of a Nano-SIM card, with a capacity of up to 256GB.

At the launch of the Mate 20 smartphone launch in London, Huawei Mate introduced a new enhancement to storage memory. It's "Nano Memory Card", the memory card is in the format of a Nano-SIM card, with a capacity of up to 256GB.

With this new technology, Huawei Mate 20 Pro, though not equipped with MicroSD card slot, can expand its storage memory.

Nano Memory Card has a write speed of 90MB / sec, equivalent to the speed of MicroSD card but it is much smaller in size, only 45% compared to regular MicroSD memory card.

However, currently users cannot use these Nano Memory Card memory cards because it is not yet popular.
