

Narrow hand made beautiful 3D embossed flower cards for October 20

A handmade gift for your own hand makes more sense than any other expensive gift. You can make a beautiful 3D embossed flower card for your relatives and friends on Vietnamese Women's Day.

A handmade gift for your own hand makes more sense than any other expensive gift. You can make a beautiful 3D embossed flower card for your relatives and friends on Vietnamese Women's Day October 20.

3D flower card making material

1. Red, white, blue, pink cover paper
2. Petal cutting tools
3. Watercolor, brush
4. Pens, crayons, scissors, glue

You can choose a red paperboard with a pattern or a floating flower to make your card look better.

How to make 3D floating flower cards

Step 1:

Use the petal cutter to cut the white paperboard into flowers in 3 different and small shapes and sizes as shown.

If you don't have that tool, you can draw or print the flowers on the paper and cut it according to the drawing.

You can choose other flower styles according to your preferences.

After that, you use a pink felt brush to decorate the flower more vividly.

Step 2:

With blue colored paperboard, you shape the leaves, or you can draw leaves on the paper and cut it. After that, double the leaf to make the main line along the leaf.

Use a colored pen to paint horizontal veins for a more natural part.

Stack 3 overlapping flowers, to form a flower with many layers of small wings staggered. Use fixed glue to fix milk. Add green leaves to the flower.

Cut a small circle from the pink paperboard stuck in the middle to make the pistil. Or you can use watercolor to paint.

Do the same as above to have 3 flowers.

Step 3:

Next, cut the red paperboard into a rectangle 20.4 cm long and 13.2 cm wide to make cards.

Use the ruler and then type the center mark at the edge of the card (symbol C).

According to the width of the card, measure and mark the position of 3.6 cm long (marked on both sides respectively, symbols A and B). Fold the paper cover along AC and BC lines.

Cut the white paperboard into a 9cm square. From the top of the square, you measure diagonally, mark at the point of 3.6 cm in length and cut out the right angle as shown.

Step 4:

Paste 2 flowers on a white cover

The other flower is stuck between the 2 folds of the red cover.

Then, put the white paperboard in the red paperboard as shown to create a 3D floating flower card.

Good luck!
