

# NASA announces a stunning series of GIF images that capture the historic moments of the aerospace industry

For those who love space exploration, the NASA GIF series has just announced it will be the best gift for them to better understand the world outside the Earth and astronaut's work.

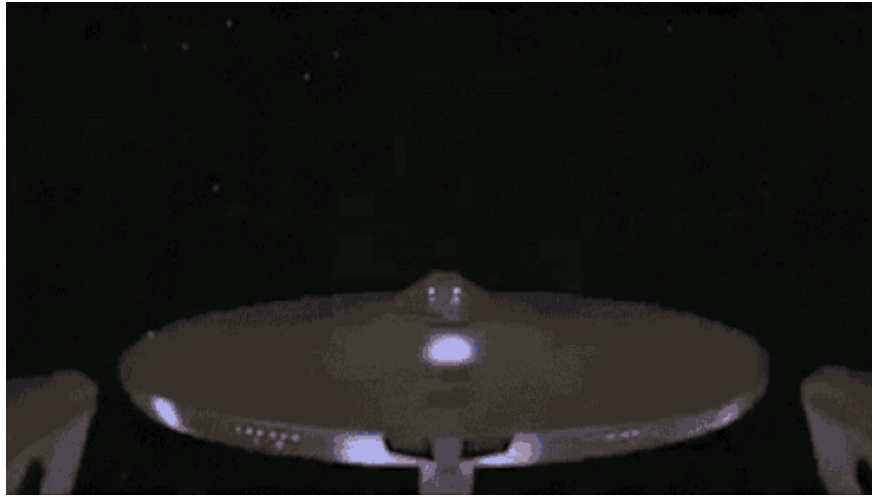

For those who love space exploration, the **NASA GIF** series has just announced it will be the best gift for them to better understand the world outside the Earth and astronaut's work.

Recently, NASA has made a commendable effort to "open up" huge photo and video archives for the Internet community. Last October, the agency also partnered with **Flickr** to publish thousands of photos of **the Apollo history mission** .

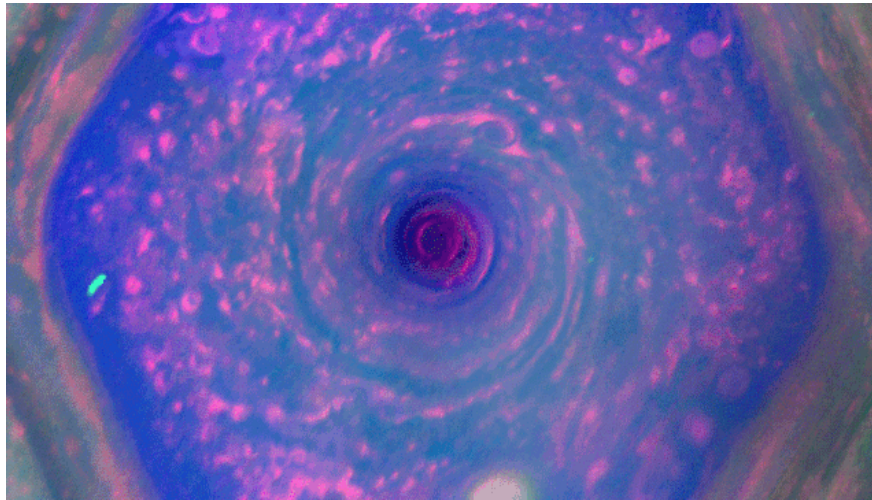

Pluto from a small dot is released

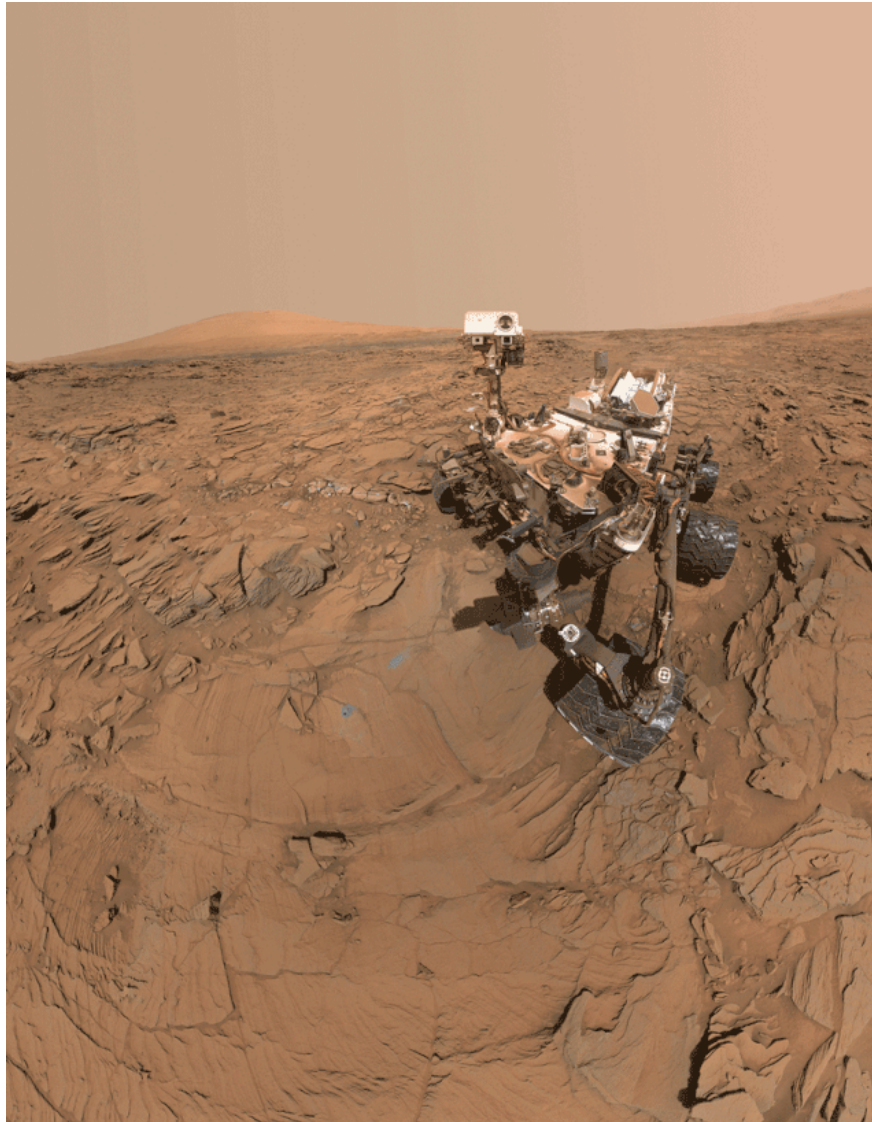

On Thursday, NASA once again generously offered lovers to explore the universe to admire the lively and spectacular GIF series. If you want to see the original, Internet users should set up a social network account Pinterest or GIPHY and then go to NASA's site to explore this valuable database.

Those are unforgettable moments in the history of human exploration of the universe. You can look at the beautiful planets, the deep space out there and the scenes of the astronaut's everyday life.
