

Natural marvels, ant herds of millions connect the tail of a living bridge to break the bee's nest

Francisco Boni, a Brazilian engineer posted a short video called The Attack of the Army on the nest of bees that captured a million ants stacked up to build bridges. to attack the beehive nest is making netizens fever.

Francisco Boni, a Brazilian engineer posted a short video titled "The attack of the army of ants on the beetle nest" capturing an ant colony of up to millions of stacked animals. building bridges to attack the beehive nest is making netizens fever.

The ant species is small but with discipline, the amount of 'terrorism', collective intelligence, they have made the impossible.

Boni seemed to understand very well about this type of fighting in the insect world, he said, before the attack of the ants, the bumblebees often fled. The ants will occupy the entire beehive, catch and forgive the spoils of larvae, pupae, even the adult bumblebees that have yet to escape.
