

Netbook play the first game in the world

Asus has just launched the world's first netbook model dedicated to gaming.

Asus has just launched the world's first netbook model dedicated to gaming.

If you think the Intel Atom cheap processor can't be used for a gaming netbook, you're wrong. Asus N10J with 10 inch display screen and using Atom N270 CPU processor, 1 GB Ram can do this.

According to the manufacturer, this netbook model not only provides the ability to surf the Web, read and send emails but also provides the ability to play video games.

Asus N10J runs on Microsoft Windows XP operating system and has built-in Nvidia GeForce 9300 graphics processor so gamers can play games that require high graphics such as Unreal Tournament III. You can own this netbook for about 695 USD.
