

Netbooks and Nettop received a very positive response in Vietnam

According to Intel Vietnam, Netbooks using Intel Atom processors are currently widely commercialized in Vietnam

According to Intel Vietnam, Netbooks using Intel Atom processors are currently widely commercialized in Vietnam with products from Vietnamese companies as well as foreign companies, such as the Company. CMS, Acer, Asus, Axioo, MSI and Lenovo. Up to now, there are more than 60 Netbook and Nettop designs worldwide.

Mr. Than Trong Phuc, General Director, Intel Vietnam and Indochina said: '*Netbooks and Nettop are currently receiving very positive reactions in Vietnam in recent months. With the widespread presence of Netbooks and Nettop using Intel Atom processors, we believe there will be more Vietnamese consumers to benefit from this technology product .*

According to Mr. Phuc, Netbooks are small mobile devices for students, students and Internet users for the first time as well as users who want to have another computer. These Netbook products serve the needs of using basic computing applications, listening to music, emailing and surfing the Internet. These devices can also be used to play basic online games, social networking and VoIP phones.

According to Mr. Thieu Phuong Nam, Regional Sales Manager for Intel Vietnam and Indochina: " *The Intel Atom processor is specifically designed for applications that focus on the Internet. Using Intel Atom processors will help increase the number of people using computers and the Internet in Vietnam.* "

Also related to the Netbook and Nettop series, CMS Computer Company said that in September, the company will introduce new ICbook versions to the market. The new version of ICbook will have 8.9-inch screen, integrated Intel Atom processor, 1GB RAM, 80 GB hard drive, wireless network access device, 1.3 megapixel camera . The product weighs less than 1kg and has a battery life of up to 3 hours to meet the needs such as surfing the web, studying, playing games, entertainment and connecting with friends and relatives.

Also according to CMS, the launch of this new version of ICbook not only meets the diverse needs of consumers but also shows the investment for ICbook's determination to occupy at least 10% of the laptop's sales. CMS marketed in 2008.
