

# New feature on Facebook, allowing inserting music into photos and videos

Facebook is testing a new feature that allows users to insert music into photos and videos for certain users and soon be available to all users in the next few weeks.

Facebook is testing a new feature that allows users to insert music into photos and videos for certain users and soon be available to all users in the next few weeks.

To insert music into photos or videos, users only need to upload photos or videos, click on the 'Add a Song' button, immediately the list of songs, artists or favorite genres will appear, you just need to Select one of them and click on Add to add the name of the song and artist, which is also displayed after successfully posting, because of copyright issues, users will only be able to add music in Facebook's repositories but not Upload or select outside.

Mata Patterson, Product Manager of Facebook Stories, said that adding music will help users express themselves more creatively and share.

Facebook is actively engaging more users by offering many new features.
