

New features and improvements in iOS 11 beta 2

The iOS 11.1 beta 2 version was released on Monday with many new enhancements and features including hundreds of new emoticons and the 3D Touch feature is back.

IOS 11.1 beta 2 has been released on Monday with many new improvements and features. Let's take a look at this update of the work that has nothing to note!

New features and improvements in iOS 11 beta 2

1. Completely new emoji Unicode 10 character.
2. Fix accessibility errors on the main screen.
3. Refine Emergency SOS options.
4. The multitasking 3D Touch feature is back.
5. Fix Lag Camera error when using Portrait mode on iPhone 7 Plus and iPhone 8 Plus.
6. There are also small improvements in speed, for smoother effects.

1. How to install the latest iOS beta on iPhone

Perhaps users will be happy to have hundreds of new emoji in iOS 11.1 beta 2, along with the return of 3D Touch multitasking gestures that have been removed in the previous version.

">

The deployment of 3D Touch gestures will be improved in this version of iOS 11.1 beta 2. This feature can be used to quickly access multitasking (App Switcher) and quickly switch between the two most recently used applications.

Hopefully Apple will soon release iOS 1.1 official version for users to experience.
